PRODUCT ENGINEERING

1959 INDEX

McGRAW-HILL WEEKLY OF DESIGN, RESEARCH AND DEVELOPMENT

Part II — Volume 30
Weekly Issues — July 6 Through December 28

— A —

Adhesives
Adhesive to bond silicone rubbers that vulcanize at room temperature (D) July 20 20
Hi-temp bonds need the right metal with adhesive (D) ..... Oct 12 35
Low-cost epoxy adhesive (SP) .. Dec. 7 97
Triple-action adhesives (D) ..... Dec. 7 40

Administration see **Engineering Administration**

Aeronautics
Aircraft stretching materials limitations (N) ..... Aug. 31 23
Aluminum takes to transport (N) Sept. 28 26
Boeing, FAA answer critics of 707 jetliner mishaps (N) ..... Aug. 17 25
Cooling unit for radar receiver-transmitters (N) ..... Oct. 5 24
Forecasts of aircraft and missile needs (N) ..... Aug. 10 13
Last manned aircraft may be VTOL (N) ..... Dec. 21 26
Lithium pays-off in new aircraft alloy (N) ..... Nov. 23 39
Man-powered flight gets serious attention (N) ..... Dec. 28 10
Nuclear-powered airplane (D) .. Aug. 10 10
Queen Bee (N) ..... Sept. 7 26
What shapes aircraft? McFarland & Kolb (T) ..... Nov. 16 32
Wind tunnel achieves air speeds from Mach 5 to 9 (N) ..... Oct. 12 41

Aluminum
Aluminum-alloy structures. C. R. Smith (DD) ..... Mid-Sept. F298
Aluminum forgings for precision tolerances. Erhard & Krajewski .. Aug. 17 51
Aluminum to replace steel? (N) Dec. 28 11
Alcoa student awards (T) ..... Sept. 7 38
Beryllium additive improves alloy (N) Nov. 23 42
Casting offers efficiency, economy (N) Oct. 26 41
Coils wound with aluminum strip near commercial production (D) .... July 6 33
Crack initiation and propagation in aluminum sheet (A) ..... Aug. 3 83
First extruded multiple hollow shape (N) ..... Oct. 26 39
High-temperature alloys ready for evaluation (D) ..... Nov. 30 7
Horn uses coil of aluminum foil (N) Oct. 26 38
Laminated aluminum foil is stronger and lighter than solid sheet (D) Aug. 3 20
Methods of soldering aluminum. Charles Bruno (DD) ..... Mid-Sept. G372
Molten aluminum trucked to foundry (N) ..... July 27 31
Porcelainized cast aluminum. E. J. Tangerman ..... Aug. 17 47
Specifications for anodized finishes—report. R. V. Vanden Berg .. Sept. 28 44
Transport industry takes to aluminum (N) ..... Sept. 28 26

Amplifiers
Parametric amplifier doubles radar range (N) ..... July 13 24

Appearance Design see **Industrial Design**

Appliances
Combination refrigerator-electric-range-sink (T) ..... July 27 35

Applied Mechanics
Bevel-gear calculations. B. J. Mumken (RS) ..... Sept. 14 93
Dry-friction damped isolators. G. W. Painter ..... Aug. 3 48
External-shoe brakes. J. Hirschhorn Nov. 23 75
Finding stresses in a pressure-vessel head. R. E. Wong ..... July 6 57
Friction drive features spring-loaded idlers. Kaplan & Beaumont .. July 6 54
Hardness conversion—Knoop vs. Vickers. Lloyd Edmond (DD) .. Mid-Sept. A 38
Hydraulic servovalves. Walter Ernst Nov. 9 84
Minimum screw-lengths for tapped holes. Gil Riske (RS) ..... Sept. 28 69
Planetary friction drive. L. J. Bonin Oct. 12 79
Prediction of induction-motor performance. C. C. Libby ..... Dec. 21 42
Shaft torque: charts find equivalent section. Dr. B. N. Ghosh (RS) Aug. 31 47
Vibration limits for equipment set by operator's comfort. A. C. Potter Aug. 31 42

Automotive
All-electric car—Stinson seeking to resume manufacture (N) .. Sept. 28 29
Aluminum takes to transport (N) Sept. 28 26
Army's campaign under way for trucks with interchangeable parts (N) Sept. 21 21
British-Morris Mini-minor (N) .. Sept. 28 29
Cadillac—1959 Cadillac revised by top industrial designer (N) ..... Oct. 6 26
Cafe engineering in Detroit (Ed) Sept. 28 39
Camera, tape recorder show driver errors (N) ..... July 13 23
Chem-milling for the car industry (N) Aug. 17 22
Chevrolet's Corvair (PD) ..... Oct. 12 70
Chinese inventor converts car momentum into fast-braking power (N) Aug. 10 24
Chrysler's Valiant (PD) ..... Oct. 26 64
Compact vs. small cars (N) .... Oct. 5 23
Dump truck (T) ..... Aug. 24 37
Electric car maker forced overseas by high subcontracting costs (N) Aug. 3 23
European car design—newer trends (T) Nov. 30 31
Europe's new cars to meet U. S. competition ..... July 27 21
Ford's Falcon (PD) ..... Sept. 28 58
Ford's M-E-L Div.'s Comet (N) .. Oct. 12 41
Ford's 1960 side-shields will be of plastic (N) ..... Aug. 3 19
Horn uses coil of aluminum foil (N) Oct. 26 38
Jeeps get star billing at Frankfurt auto show (N) ..... Nov. 9 37
Los Angeles smog-fighters battle to clear the air (N) ..... July 6 37
Motorized wheel (PD) ..... Sept. 14 71
Plastics in foreign cars on the upswing (D) ..... July 6 35
Prvenac (T) ..... Sept. 21 34
Sealed cooling system for cars sought (N) ..... Ju.y 13 23
Small car repaired easily, needs little lube (PD) ..... Aug. 17 58
Small cars—eight design authorities evaluate 1960's small cars .... Nov. 2 32
Suspension system highlights innovations in 1960 truck line (N) .. Sept. 14 39
"Trabant" (T) ..... Oct. 5 44

— B —

Batteries
Battery-power motor. W. M. L. Rogers Oct. 12 62
Flexible-zinc-silver-chloride batteries that can be spliced (D) .... Aug. 10 7
Low-cost rechargeable dry batteries from Japan (D) ..... Nov. 2 9
Those higher-energy batteries—a practical look. Dalin & Solomon .. Aug. 31 33

Bearings
Ballbearings at high speeds and extreme temperatures (A) ..... Oct. 12 137
Bearing damage by electrical currents. Boyd & Kaufman (DD) .... Mid-Sept. I476
Bearing liners from powder metal (D) Nov. 16 11
Bearings that last longer (D) .. Dec. 21 20
Bronze bearings will cost less to produce (D) ..... Sept. 7 9
Design data for flat air bearings. H. L. Wunsch ..... Mid-Sept. F288
Gas bearings. Nicholas Chironis Nov. 23 68
Gas bearings guide satellites into space (N) ..... Nov. 9 41
How ballbearings will perform. R. C. Mims. Pt I Sept. 14-78, Pt II Sept. 28 41
How to find stresses and deflections in spoked-bearing-supports. Lawrence Berko (RS) ..... July 6 79
Hydrostatic gas bearings (A) .. Oct. 26 122
Low-friction bearing uses mercury as lubricant (D) ..... Aug. 31 17
New bearing assembly for vertically mounted motors (D) ..... Sept. 28 24
New equations for roller bearings (A) Dec. 7 143
Performance of ballbearings. R. L. Mims ..... Sept. 14 78
Precision "X" type bearing (N) Nov. 23 42
Reinforced Teflon bearing (SP) .. Aug. 31 51
Spherical bearings need no lubricant (N) ..... Dec. 21 26
Titanium carbide in hi-temp bearings (D) ..... Oct. 26 36

Belt Drives and Conveyors
Comparison of belts, chains, gears. E. S. Cheaney & others (DD) Mid-Sept. E210
Differential drive for rubber conveyor belts (D) ..... Aug. 31 18
Friction drive features spring-loaded idlers. Kaplan & Beaumont .... July 6 54
Oriented nylon strip for conveyor belting (D) ..... July 20 20

Bending
Symmetrical bending of circular plates. R. E. Wong (DD) ..... Mid-Sept. F296

Bonding
Bonding polyester fibers to rubber (D) Sept. 21 9
Enameling process bonds porcelain to steel in one coat (D) ..... Oct. 19 8
Hi-temp bonds need the right metal with adhesive (D) ..... Oct. 12 35

(A) Abstract. (D) Developments. (DD) Design Digest. (DR) Design Roundup. (Ed) Editorials. (N) Technical News. (P) Perspective. (PD) Product Design. (PV) Points of View. (RS) Reference Book Sheets. (SP) Significant Parts. (T) Trends in Appearance Design.

Rubber-to-metal bonding. Fisch & Amann ..... Aug. 3 52

Book Reviews
Advanced energy sources and conversion techniques ..... Oct. 12 151
Aircraft structural metals and joints at elevated temperatures. L. A. Yerkovich ..... Sept. 28 104
Aluminum construction manual ..... Nov. 23 143
Applied mathematics for engineers and scientists. C. G. Lambe ..... July 6 121
Automation and computing. A. D. Booth ..... Sept. 7 49
Automation, cybernetics and society. F. H. George ..... Nov. 2 41
Automation: its impact on business and labor. John Liebold ..... Sept. 7 49
Automation today and tomorrow. L. L. Goodman ..... Sept. 7 49
Basic electronics. Bernard Grob ..... Oct. 12 155
Bearing materials for elevated temperatures. J. P. Denny ..... Aug. 3 85
Bolt, nut and rivet standards. Sept. 14 159
Charting the company organization structure ..... Nov. 23 143
The chemical elements. Helen Miles Davis ..... Dec. 21 101
Circular, cylindrical and conical thin-walled shells. Abir, Hoff, Nardo & others ..... Nov. 23 141
Coefficients of friction between dry metallic surfaces. Gaylord & Shu ..... Aug. 17 100
Color coding in displays. Conover & Kraft ..... Aug. 3 85
Company climate and creativity ..... Dec. 7 152
Cryogenic engineering. R. B. Scott ..... Oct. 12 143
Design criteria for cushioning materials. Krankover & Olevitch ..... Oct. 12 155
Design criteria for 6A1-4V titanium alloy. Childs & Lemcoe ..... Aug. 17 100
Design and the production of houses. Burnham Kelly and associated ..... Dec. 21 103
Dictionary of astronomy & astronautics. Spitz & Gaynor ..... Aug. 24 45
Dictionary of guided missiles & space flight. Grayson Merrill ..... Aug. 24 45
Dictionary of science. Frank Gaynor ..... Aug. 24 45
Diderot's encyclopedia of trades and industry. Ed C. C. Gillispie ..... Sept. 21 45
Digital computer primer. E. M. McCormick ..... Aug. 17 107
Digital computing systems. S. B. Williams ..... Oct. 12 143
Digital and sampled-data control systems. J. T. Tou ..... Nov. 9 169
Dimensional control in precision manufacturing. J. L. Gadzala ..... Aug. 3 87
Dynamic product development. Sidney Sobelman ..... Dec. 7 153
Dynamic response of human operators. McRuer & Kreadel ..... July 6 119
Effect of metals on lubricants. J. B. Christian ..... Aug. 17 105
Electric motors and generators. Emery, Harrabin & Lee ..... Oct. 26 135
Electrical measurement analysis. Ernest Frank ..... Sept. 14 161
Energy dissipation in longitudinal vibration. Chang & Goodman ..... Oct. 12 157
Engineering mechanics. Gunder & Stuart ..... Nov. 23 140
Engineering and organization. Everett Laitala ..... Sept. 14 153
Correction ..... Oct. 26 136
Engineering statistics. Bowker & Lieberman ..... Dec. 7 145
Engineering thermodynamics. Spalding & Cole. ..... Oct. 12—153, Nov. 23 140
Evaluating load ratings for roller bearings ..... Oct. 12 158
Flow measurement and control. W. F. Coxon ..... Oct. 26 135
Fluid power diagrams. ASA ..... Aug. 17 100
Frequency response for process control. Ed Caldwell, Coon & Zoss ..... Nov. 9 174
Fuel cells. B. R. Stein ..... Oct. 26 132
Fuels and lubricants. Popovich & Hering ..... Nov. 23 137
Fundamentals of electrical engineering. F. H. Humphrey ..... Aug. 3 87
The gentle art of mathematics. Dan Pedoe ..... Sept. 14 155
The great decision. Michael Amrine ..... Aug. 10 64
Guided missile engineering. Puckett & Ramo ..... Sept. 14 155
Handbook of mathematical tables and formulas. R. S. Burington ..... Oct. 26 127
Handbook of practical electroplating. T. M. Rodgers ..... July 6 122
A handbook on torsional vibration. E. J. Nestorides ..... Aug. 17 100
Heat transfer to boundary layers. Seban & Chan ..... July 20 125
High speed computing methods and applications. S. H. Hollingdale ..... Dec. 21 101
High-temperature materials. Hehemann & Ault ..... Sept. 14 157
How to increase your creative output ..... Dec. 21 103
How to invent. Forrest E. Gilmore ..... Dec. 14 52
Hydraulic of flow in pipes. C. T. R. Donkin ..... Oct. 26 127
Impact of research and development on the economy ..... Sept. 14 161
Impact and shock resistance of plastics ..... Dec. 7 155
Individual behavior and group achievements. R. M. Stogdill ..... Aug. 24 45
Individual creativity and the corporation ..... Oct. 19 57
Industrial design in the United States ..... Dec. 21 101
Influence of shaft deflection and surface roughness on capacity of plain journal bearings. Raven & Wehe ..... Oct. 12 158
Introduction to stress analysis. C. O. Harris ..... Sept. 28 100
Inventions, patents and their management. Berle & De Camp ..... Dec. 14 52
Inventor's progress. J. G. Leithauser ..... Oct. 5 56
Kinematic analysis of mechanisms. Joseph Edward Shigley ..... Sept. 14 157
..... Nov. 23 139
Kinematics. V. M. Faires ..... Dec. 7 145
Legibility of reflex-reflective numerals. Crannell & Debons ..... July 6 122
The logic of scientific discovery. K. R. Popper ..... Aug. 10 64
Machinery's handbook. Oberg & Jones ..... Nov. 9 174
Magnetism and magnetic materials. Osborn & others ..... Nov. 9 173
Man's senses as information channels. Mowbray & Gebhard ..... July 6 119
Masters of modern architecture. John Peter ..... Oct. 5 56
Mathematical analysis. E. M. Hemmerling ..... Nov. 23 137
Mechanics—Part I: Statics and Part II: Dynamics. J. L. Meriam ..... Aug. 17 105
Men and atoms. W. L. Laurence. Dec. 28 33
Men of science in America. Bernard Jaffe ..... Dec. 7 149
Microminiaturization of electronic assemblies. Horsey & Shergalis. Oct. 26 133
The moon car. Hermann Oberth. Nov. 30 41
1958 book of ASTM standards. July 20 125
1958 Proceedings of Institute in Technical and Industrial Communications ..... July 13 48
Operations research — methods and problems. Sasieni, Yaspan & Friedman ..... Oct. 12 147
Patents & inventions ..... Dec. 14 52
Performance of lubricating oils. 2nd ed. H. H. Zuidema ..... Dec. 7 151
A philosopher looks at science. J. G. Kemeny ..... Nov. 2 41
Physical anthropology in human engineering. Hansen & Cornog ..... July 6 119
Physical metallurgy. C. E. Birchenall ..... Oct 12 151
Physical properties of polymers. Sept. 28 103
Precipitation-hardenable stainless steels Roberts, Roach & Hall ..... Oct. 12 153
Principles of analog computation. Smith & Wood ..... Dec. 7 145
Principles of direct-current machines. A. S. Langsdorf ..... Sept. 28 100
Principles of management. Koontz & O'Donnell ..... Oct. 26 131
Property measurements at high temperature. W. D. Kingery ..... Dec. 7 155
Readings in human relations. Davis & Scott ..... Aug. 24 45
Refractories for seal and bearing applications ..... Sept. 28 101
Research techniques in human engineering. Alphonse Chapanis. Nov. 9 171
Risk and technological innovation. W. Paul Strassman ..... July 27 44
Rocket encyclopedia illustrated ed. Herrick & Burgess ..... Nov. 16 45
Sampling inspection tables. Dodge & Romig ..... Oct. 12 151
Scientific Russian. G. E. Condoyannis ..... Nov. 9 169
Seal materials for high-temperature application. R. H. Baskey ..... Aug. 17 102
Semiconductors and transistors. D. M. Warschauer ..... Nov. 9 169
Servomechanism fundamentals. Ben Zeines ..... Nov. 9 173
Servomechanism and regulating system design. Cheatham & Mayer ..... Oct. 12 161
Solid-state magnetic and dielectric devices. H. W. Katz ..... Aug. 3 85
Source book of the new plastics. H. R. Simonds ..... Dec. 21 102
The sport car—its design and performance. Colin Campbell ..... Nov. 16 45
Successful technical writing. Tyler G. Hicks ..... July 13 48
Symbolic logic and intelligent machines. E. C. Berkeley ..... Aug. 17 100
Technical calculus and analysis. Rice and Knight ..... Sept. 14 157
Technical reporting. Ulman Jr. & Gould ..... July 13 48
The technical writer. Godfrey & Parr ..... July 13 48
Thermodynamics. G. J. Van Wylen ..... July 20 127
Tool engineers handbook 2nd ed ..... Dec. 7 147
Transistors in radio, television and electronics. M. S. Kiver ..... Oct. 26 127
Translations: services and sources ed. F. E. Kaiser ..... Sept. 28 100
Uspekhi Fizicheskikh—Soviet physics ..... July 27 44
Wear, friction at high sliding speeds. F. M. Sauer ..... Sept. 14 153
Words of science. Isaac Asimov. Oct. 19 57
Yardsticks for industrial research. J. B. Quinn ..... Sept. 28 103

Brakes
Braking circuit for synchronous motors (D) ..... Aug. 3 19
California beats bushes for safer truck brakes (N) ..... Dec. 28 20
Chinese inventor converts car momentum into fast-braking power (N) ..... Aug. 10 24
Design of external-shoe brakes. J. Hirschhorn ..... Nov. 23 75
Electromagnetic brakes (SP). Aug. 31 51
Four ways to stop a motor. C. H. Buchanan ..... July 6 60
Low-cost brake for fhp motors (SP) ..... Dec. 28 29
Trailer brake cools self centrifugally (PD) ..... July 6 64

Brazing
Predicting gap change in brazing dissimilar metal joints. D. C. Herrschaft (DD) ..... Mid-Sept G365
Titanium brazing alloys in foil form (D) ..... Oct. 5 8

— C —

Cams
15 ideas for cam mechanisms. F. Strasser (DR) ..... Aug. 3 56
Recoil of 20mm gun gets lost in cam mechanism (PD) ..... Oct. 26 66
Soviet instrument for laying out cams (D) ..... Oct. 12 35

Capacitors
Electrolytic capacitors made of high-purity aluminum foil (D) ... Aug. 17 19
Failures of 1 in 100,000 proposed (N) ..... Aug. 31 21

Castings
Aluminum casting offers efficiency, economy (N) ..... Oct. 26 41
Cast epoxy models. A. W. Wakeman ..... Dec. 21 60
Cast nylon gears in sizes to 2 ft. (D) ..... Aug. 10 7
Diecasting experts put on griddle (N) ..... Nov. 16 21
8 ways to design economy into malleable iron castings. H. L. Kee ..... Nov. 9 32
Improved chrome plate—better diecasting (N) ..... Nov. 30 27
Microporosity and ductility of steel castings (D) ..... Sept. 21 9
Permanent-mold casting process (SP) ..... July 6 83
Permanent-mold castings. W. A. Hamilton ..... Aug. 31 40
Porcelainized cast aluminum. E. J. Tangerman ..... Aug. 17 47
Precision-cast shapes for scandium metal (D) ..... Dec. 14 8
Tighter investment — cast tolerances. H. Matthieson ..... July 20 49
When specifying a cast iron. W. H. Moore ..... Oct. 12 65

Ceramics
Ceramic materials — properties for structural uses. Knapp & Stanley (DD) ..... Mid-Sept. C118
Ceramic mirror blanks (SP) .... Sept. 7 44
Ductile ceramics (N) ..... Sept. 21 14
High-purity alumina ceramic better than sapphire gem stones (N) ..... Sept. 28 28
New ceramics feature abrasion and erosion resistance (D) ..... July 27 9
Refractory from rice hulls (D). Nov. 30 9

Chain Drives
Comparison of belts, chains, gears. E. S. Cheaney & others (DD) .... Mid-Sept. E210

China
Drives toward her own technology. Sanders & Kolb ..... Dec. 28 24

Clutches
Centrifugal clutch for fractional hp motors (D) ..... Nov. 9 36
Dry clutch torque evaluation. Prosek & Barber (DD) ..... Mid-Sept. F300
Electromagnetic clutch (SP) ... Sept. 28 73
Spring-wrapped slip clutches. J. Kaplan ..... Aug. 31 30
Water-cooled clutch (SP) .... Oct. 19 49

Color
Color-selector system for porcelain enamels (D) ..... Nov. 9 35
New compounds sensitive to ultraviolet light (D) ..... Sept. 28 23
When equipment says it in color. J. L. Seminara ..... Sept. 14 67

(A) Abstract. (D) Developments. (DD) Design Digest. (DR) Design Roundup. (Ed) Editorials.
(N) Technical News. (P) Perspective. (PD) Product Design. (PV) Points of View.
(RS) Reference Book Sheets. (SP) Significant Parts. (T) Trends in Appearance Design.

Compressors
Assembly and operation of air circuits. Philip Hall (DD) ..... Mid-Sept. J530
Pistonless compressor (N) ..... July 20 23

Computers
Airline reservations computing (N) ..... Nov. 23 41
Analog-to-digital converter with memory (SP) ..... Nov. 30 87
Data-processing equipment for banks (N) ..... Sept. 28 27
Decimal display of position (SP) ..... Aug. 10 53
Elements increase speed, reduce cost (N) ..... Aug. 24 32
Film research reduces computer size (N) ..... Nov. 16 22
Japanese and Swedish computer components shown at Paris Fair (N) ..... Aug. 3 21
RAMAC 305 (N) ..... Oct. 5 26
Speedy tape stops fast too (PD) . Dec. 7 70
282,000 points/min. speeds data for analyses (N) ..... Sept. 7 24

Control Systems
Amplified brain waves can be used to control (D) ..... Nov. 30 9
Attitude-control systems with microsec response time (D) ..... July 27 9
Automatic slowdown equipment for coiled materials (D) ..... Sept. 21 9
Cryogenic system of environmental control being tested (N) ..... Dec. 21 25
Electric speed governor (SP) . . Nov. 23 97
Recycling controller (SP) ..... Aug. 17 75
Sequence controller (SP) ..... Sept. 28 73
Simplified tape control has no electronics (PD) ..... Nov. 9 78
Stacked-diaphragm pneumatic controllers (N) ..... July 20 23
Static voltage control (SP) ..... Oct. 5 51
Voltage-sensitive controller (SP) ..... Aug. 24 39

Copper
Free-cutting sulphur copper (SP) ..... Aug. 31 51

Corrosion
Design for corrosion resistance. N. D. Groves (DD) ..... Mid-Sept. B62
Factors influencing corrosion (A) ..... Oct. 26 122
NBS wages war on corrosion (N) ..... Aug. 10 30
Ultrasonic measurement of corrosion (A) ..... Dec. 21 99

Counters
Endless counter tape (SP) .... Oct. 19 49

Couplings
Flexible couplings (SP) ..... Dec. 21 73
Minature flexible couplings (SP) ..... Sept. 21 39

Cryogenics
Cryogenic system of environmental control being tested (N) ..... Dec. 21 25

Cylinders
Manufacturers standardize dimensions (N) ..... Nov. 9 41
One cylinder boosts the other in this diesel (PD) ..... Oct. 12 69

— D —

Design
A-plane—engineers lose to scientists ..... July 13 21
Access openings—what size? J. L. Seminara ..... Dec. 7 62
The age of goofing off (Ed) .... Oct. 26 49
Americanizing a British design. F. W. Fernald ..... Dec. 7 64
Army develops assists for missile and rifle men (N) ..... Aug. 3 25
The big "I" in Design (Ed) .... Oct. 5 21
Century 21 Exposition—name changed ok'd (N) ..... Aug. 31 22
Century 21 Exposition opens 1962, not 1961 (N) ..... Oct. 26 40
China drives toward her own technology. Sanders & Kolb ..... Dec. 28 24
Dead-end design ..... Nov. 9 69
"Defend me from my friends . . . (Ed) ..... Aug. 17 45
Design abstracts—see specific headings and see sections of Design Digest issue (A) ..... Mid-Sept.
8 ways to design economy into malleable iron castings. H. L. Kee ... Nov. 9 82
External-shoe brakes. J. Hirschhorn ..... Nov. 23 75
58 engineering reasons why not (Ed) ..... July 20 45
Filament-winding grows up. DeBusk & McCarthy ..... July 20 46
Flameproof the product. A. R. Gardner ..... Aug. 3 38
Fluid-flow models predict design performance. Putnam & Ungar .. Aug. 17 64
Gun for jet aircraft—recoil of 20mm gun gets test in cam mechanism (PD) ..... Oct. 26 66
High-pressure air. Chadwick & Grady ..... Sept. 14 71
Higher-energy batteries. Dalin & Solomon ..... Aug. 31 33
How America influences European product development. Peter Muller-Munk (T) ..... Dec. 14 36
'Industrial Designers told 'know thyself' (N) ..... Dec. 14 30
Japan applies control on design this week (N) ..... Oct. 26 40
Japan will create national optical design center (N) ..... Aug. 17 22
Japan's 5-story science hall beneath 1472-ft. television antenna (N) ..... July 27 29
Japanese apply export design law (N) ..... Oct. 19 24
ME's essential to architecture (P) ..... Aug. 17 43
Multi-variable experiments. W. J. Hill ..... Dec. 21 56
Navy's giant telescope design .. Nov. 16 19
Our mile-long enomomy (Ed) .. Aug. 3 37
Permanent-mold castings. W. A. Hamilton ..... Aug. 31 40
Polyester premix molded parts. Doyne & Feuer ..... Oct. 12 76
The quality copyist (Ed) ..... July 13 19
Soviet Exhibition report ..... July 20 21
Specify surface conditions (A) .. Nov. 23 136
Spring-wrapped slip clutches. J. Kaplan ..... Aug. 31 30
Structural models—they p.eview stress and strain—report ..... Oct. 26 55
Pt I Theory of similitude. Dr. R. Simon ..... Oct. 26 56
Pt II Building the better model. R. G. Carlson ..... Oct. 26, 59
Pt III The model at work. C. W. Bert ..... Oct. 26 61
Ten commandments for reliability (A) ..... Dec. 7 138
13 handles for instruments. F. W. Wood Jr. (DR) ..... Sept. 14 90
Tighter investment-cast tolerances. H. Matthieson ..... July 20 49
Tiknik technique (Ed) ..... Nov. 16 17
Transistors—the 6 basic types. Harry Goff ..... Aug. 3 42
Vibration limits for equipment set by operator's comfort. A. C. Potter ..... Aug. 31 42
What shapes aircraft? McFarland & Kolb (T) ..... Nov. 16 32
Work-hardened sheetmetal. H. A. Jahnie ..... Oct. 26 76

Drafting
Draftsmen—Nothing fails like failure (P) ..... Aug. 3 35
Engineers vs draftsmen? (PV) .. Dec. 14 40
Measure drafting time by the square foot. D. H. Millenson ..... Aug. 31 32
Painless drawing changes. J. W. Born ..... Sept. 14 83
Student draftsmen pay off for aircraft firm (N) ..... Dec. 14 24
13 ways to cut drafting costs. A. F. Gagne ..... Sept. 28 54

Drawing and Forming
Cold-draw forming method solves tube diameter problem (N) ..... Sept. 14 37
Continuous blow-forming of extruded tubing (A) ..... Sept. 28 99
Explosive metal forming (A) .. Aug. 3 83
Man-made lightning for metal forming (N) ..... Sept. 21 27

Setscrew also provides grip (SP) July 20 73
6 snap-action mechanisms. P. C. Noy (DR) ....Aug. 17 68
T-nut that can be inserted and removed (D) ....Nov. 16 11
12 clamps for flexible hose. W. F. Wood Jr. (DR) ....July 6 76
29 blind-side fasteners. Federico Strasser (DR) ....July 20 66
29 ways to fasten springs. Federico Strasser (DR) ....Dec. 21 66
22 clamps for wire and cable. F. W. Wood Jr. (DR)....Oct. 26 80
Wingnut made of sheetmetal (D) July 13 11

Fibers
Asbestos fiber lighter in color (D) Nov. 2 9
New epoxy-fiber compositions for production. A. P. Mazzucchelli (DD) Mid-Sept D166
Polynosic won't shrink or stretch (N) Sept. 21 14
Titanium can be strengthened by metal-fiber reinforcements (D) ....Nov. 16 7
Today's diaphragms—coatings and fabrics. E. C. Hemes ....Oct. 26 68

Filters
Filter combination (SP) ....Aug. 31 51
Hydraulic filter of coated glass fabric has high flow rate (D)....Aug. 31 17
In-line filter (SP) ....Dec. 7 97
Non-woven, low-density filter (SP) Nov. 9 105

Finishes, Chemical
Chemical coatings protect steel surfaces when heat-treating at high temperatures (N) ....Oct. 26 33
Finishes for springs (A) ....July 6 117

(A) Abstract. (D) Developments. (DD) Design Digest. (DR) Design Roundup. (Ed) Editorials. (N) Technical News. (P) Perspective. (PD) Product Design. (PV) Points of View. (RS) Reference Book Sheets. (SP) Significant Parts. (T) Trends in Appearance Design.

Insulating finishes with high electric strength (D) ..... Dec. 21 19
One-coat white porcelain (SP)..Aug. 3 63
Self-curing zinc coating (SP)..Oct. 5 51
Surface coatings incorporate tung oil as the vehicle (D) ..... Nov. 9 35
Tin-nickel alloy coatings (D)..Oct. 26 36

Finishes, Mechanical
Electrodeposited metal coatings protect metals from corrosion (N)..Dec. 14 15

Finishes, Paint
Improved conductive paints (D) ..... Sept. 7 9
Temperature-sensitive paints get a new booster (D) ..... Aug. 3 19

Finishes, Plastic
Finishes for springs (A)..... July 6 117
Porcelainized cast aluminum. E. J. Tangerman ..... Aug. 17 47
Vinyl coating methods for metal parts. F. J. Nagel ..... July 6 70

Fluishing
Fused-salt process for applying metal coatings (N) ..... Nov. 30 13
Low-pressure, low-temperature surface-finishing process (SP) ..... Aug. 10 53
New enameling process (D)....Oct. 19 8
New route to metal coating based on superfluidity (D) ..... Dec. 28 8
One machine sprays, degreases, coats (N) ..... Nov. 2 24
Spark-coating (N) ..... July 20 22
Specifications for anodized finishes—report. R. V. Vanden Berg....Sept. 28 44
Tin coatings should be applied electrolytically and fused in place (D) ..... Nov. 2 9
Torch coats tungsten directly to nozzle (N) ..... Dec. 14 32
Vinyl coating methods for metal parts. F. J. Nagel..... July 6 70

Fittings
Pressure losses in hydraulic branch-off fittings. Daniels & Pelton....July 20 60

Fluid Mechanics
Basic designs in fluid power circuits (DD) ..... Mid-Sept. J538
Fluid-flow models predict design performance. Putnam & Ungar..Aug. 17 64
Fluid power, control . . . where next? (N) ..... Nov. 16 23
Fluid power diagrams (DD)..Mid-Sept. J542
Pressure losses in hydraulic branch-off fittings. Daniels & Pelton....July 20 60
Sealants for fluid control. W. M. Langton (DD) ..... Mid-Sept. J541
Synthetic hydraulic fluids—which rubberlike material. Webster & Larkin (DD) ..... Mid-Sept. J535

Fluids
Evaporation of liquids speeded by impurities (N) ..... July 27 14
Hydraulic fluid developed for X-15 (N) ..... July 6 38
Hydrostatic head of liquids. S. Saliva ..... Mid-Sept. J533
Industry seeks fluids, hardware to meet Mach 3 needs (N)..... Dec. 14 26
Liquid density measured by vibration of unbalanced rotor (D)..... Aug. 24 8
Liquid transition points may be as useful as those in metals (D)..Sept. 14 36

Forgings
Aluminum forgings for precision tolerances. Erhard & Krajewski..Aug. 17 51
Explosive-forging techniques (D) ..... Oct. 26 35
Giant forge to shape space equipment (N) ..... Dec. 21 36
High-strength closed-die aluminum forging (N) ..... Aug. 17 26
Large forged tungsten parts (SP) ..... Dec. 28 29

Friction and Wear
Friction drive features spring-loaded idlers. Kaplan & Beaumont..July 6 54
Lubricants and wear (A)..... Sept. 14 149
Planetary friction drive. L. J. Bonin ..... Oct. 12 79
Reduction of static friction (A)..Dec. 7 138
Rolling friction (A) ..... Dec. 21 100
Simulators measure abrasion resistance
Standard machines test candidates quickly. D. Gardner..... Nov. 9 70
Abrader custom-built for a special job. S. Bortas ..... Nov. 9 72

Fuel
Boron-base fuels to be continued as rocket propellants (D) ..... Dec. 28 9
Diesel-powered ships switching to gas fuel (N) ..... Sept. 7 27
Fuel cell licensing under sharp attack (N) ..... Sept. 7 28
High-temperature fuel cells (D).Sept. 14 36
Military high-energy fuel program under scrutiny (D) ..... July 27 10
Nuclear-powered fuel cells (D).Aug. 17 20
Reactor fuel elements cast in vacuum (N) ..... Nov. 2 22
Research on fuel performance (N) ..... Nov. 2 12
Solid-propellant fuel supplies hot gas that runs servo (PD)..... Aug. 31 35
Tractor runs on fuel cells (D)..Oct. 26 36

— G —

Gaskets
Fiber-reinforced gasketing (SP) ..... Aug. 3 63
5 important gasket materials. F. W. Wood Jr. (RS) ..... Dec. 7 92

Gears
Arcs subtended by small angles. M. A. Donohue (RS)..... Nov. 9 98
Bevel-gear calculations. B. J. Mumken (RS) ..... Sept. 14 93
Cast nylon gears in sizes to 2 ft. (D) ..... Aug. 10 7
Comparison of belts, chains, gears. E. S. Cheaney & others (DD). Mid-Sept. E210
Cutoff machine—gears control flying knife (PD) ..... Aug. 31 36
18 ways to control backlash in gearing. F. T. Gutmann ..... Oct. 26 71
Experts debate merits of Soviet engineer findings (N)..... Aug. 31 21
5 cardan-gear mechanisms. Sigmund Rappaport (DR) ..... Sept. 28 66
Fume lubrication for gears (D)..Aug. 17 20
Gear-force analysis. T. G. Hicks (RS) ..... Aug. 17 71
Gear materials (A) ..... Nov. 9 165
Geared drives — overload protection. Arthur Terry ..... Dec. 7 82
High-speed tool steel best for gears at 700 F (D) ..... July 27 9
Lubrication research and development (A) ..... Aug. 17 99
Nylon resin spur gears. Hall & Alyord (DD) ..... Mid-Sept. E204
Planetary gear train design. O. K. Kelley (DD) ..... Mid-Sept. E214
Smaller gear packages designed (N) ..... July 27 22
Specifications ready for spring of 1960 (N) ..... Nov. 9 40
Surface fatigue is the most common cause of gear failure (D)...July 20 20
Survey method evaluates residual stresses. Berguist & Lenhoff..Sept. 14 84
3 nomographs aid gear-force analysis. T. G. Hicks (RS)..... Aug. 3 59
Titanium gears (N) ..... Aug. 24 31

Generators
Brushless ac generator (T)....Nov. 30 30
Multi-anvil, wedge-type high-pressure generator (A) ..... Oct. 12 137

Glass
Glass-hardening process (D)..Aug. 10 9
Glass wrap for rocket engines boosts strength, cuts cost (N)..... Dec. 14 22
High-purity silica sintered in new process (N) ..... Oct. 5 23
Molding glass reinforced parts (DD) ..... Mid-Sept. D177
Multiform fused silica (SP)....Oct. 26 87

Government
Air Force policy shift (D).....Nov. 30 11
Army develops assists for missile and rifle men (N)..... Aug. 3 25
Army field equipment undergoing major changes (D) ..... Oct. 5 11
Basic military research spending (D) ..... Oct. 5 11
Budget talk will increase (D)..Nov. 30 11
Century 21 Exposition opens 1962, not 1961 (N) ..... Oct. 26 40
Chemical-fuel engine contract cancelled (D) ..... Aug. 24 11
Congress calls halt on import of 'cut-rate' Soviet school lab equipment (N) ..... Aug. 17 22
Congress says Army, Navy not getting their share of R&D money (N) ..... Sept. 28 27
Congress slow to limit state taxing of out-of-state companies (N)...Aug. 24 21
Defense contractors must still face contract renegotiations (D).....July 27 10
Defense contracts to be chopped (D) ..... Sept. 7 10
DOD's budget has its ups and downs (N) ..... Sept. 14 40
Military high-energy fuel program under scrutiny (D)..... July 27 10
More defense money for small business (D) ..... Dec. 14 13
More liberal government patent policies likely (D) ..... Dec. 28 9
NASA—tight budget forces cutbacks (D) ..... Dec. 28 9
NASA may change patent policy (N) ..... Sept. 7 25
Nuclear-plane program awaits power plant (D)..... Aug. 10 10
Pentagon cancels R&D contracts (N) ..... Sept. 21 25
Price of R&D: $2 billion in contract cancellations (D)..... Sept. 21 11
Proposed 1960 budget for R&D, hardware (D)..... Nov. 2 11
Sea water conversion plant contracts expected to be let before next June (D) ..... July 27 10
Should a department of science and technology be incorporated in the President's cabinet? (PV)...Sept. 21 26
Space Dept. to abolish NASA proposed (N) ..... Dec. 7 45
Supreme Court kills US security program (N)..... July 13 29
US still lags Soviets in space while federal red tape prevails (N)...Oct. 26 39
Wilcox, Dr. Howard A., deputy director of defense, lists scientific impossibilities (N)..... July 13 13

Graphical Techniques
Construction of alignment nomograms. Kececioglu & Opperthauser (DD) ..... Mid-Sept. A26
Dry-friction damped isolators. G. W. Painter ..... Aug. 3 45
Experiments that have statistical certainty. W. J. Hill..... July 6 66
Flat reinforced-plastic springs. L. A. Heggernes ..... Nov. 9 74
Gear-force analysis—4 nomographs. T. G. Hicks (RS)..... Aug. 17 71
Glass-fiber sleeve-spring for high energy absorption. Dr. K. Maier...Aug. 17 60
High-pressure air. Chadwick & Brady ..... Sept. 14 71
Isolation efficiency curve for flexible mounting systems (DD)...Mid-Sept. F295
Pressure losses in hydraulic branch-off fittings. Daniels & Pelton....July 20 60
Pressure losses in pneumatic systems. Gil Riske..... Oct. 26 50
Reserve strength in metal parts. D. J. Graziano ..... Dec. 21 45
3 nomographs aid gear-force analysis. T. G. Hicks (RS)..... Aug. 3 59

Grinding
Special templet guides 2-for-1 grinder (PD) ..... Oct. 26 62
Speeds to 100,000 rpm and tolerances to —0.0004 in (D)..... Nov. 23 36

— H —

Hardening
Glass-hardening process (D)...Aug. 10 9
Hardening process increases strength, retains ductility (N)..... Oct. 26 37

Human Engineering
Selecting control devices for human operators. Peters & Michelson (DD) ..... Mid-Sept. A39
Vibration limits for equipment set by operator's comfort. A. C. Potter ..... Aug. 31 42
What size access openings? J. L. Seminara ..... Dec. 7 62

— I —

Illumination
How light affects plastics and their protectors (N)..... Dec. 14 14
Microminiature lamps are ⅛ in. long by 0.045 in. dia. (D)..... Nov. 30 7
Miniature lamps (D)..... July 13 9
Ten-year light bulb that requires no outside power source (D)..... Nov. 23 36

Industrial Design
Alcoa student awards (T)..... Sept. 7 38
British-Soviets matching fairs (N) ..... Sept. 28 26
Business equipment show dominated by automation, electronics (N)...Oct. 5 36
Coal cutter-loader (N)..... July 20 25
Diamonds—GE divulges secret of man-made diamonds—a catalyst does it (N) ..... Nov. 23 41
Diamonds, synthetic, production upped (N) ..... Nov. 30 29
Dictating machine—single wheel does several jobs (PD)..... Aug. 17 57
Drums, imbedded-circuitry code (SP) ..... Dec. 28 29
Duplicator (T)..... Sept. 21 34
East Germany—trends in appearance design (T)..... Oct. 5 44
Flat-bed scanner uses flying spot of light (PD)..... Aug. 3 44
Furnace for rocket cases (N)..July 27 31
Heater, centrifugal-action liquid (SP) ..... Oct. 5 51
Heater, kerosene space (T).....Aug. 10 46
Hose, flexible-multiple-ply corrugated metal (SP)..... Nov. 23 97
Israel designs (T)..... Aug. 10 46
Limit-stops (SP)..... July 20 73
Movie projector—complex casting—but simplifies projector design (PD) ..... Dec. 7 68
Mower—this convertible handles lawn or lake (PD)..... Dec. 21 53
Oil well drilling-machinery (T) ..... July 27 35
Packaging machinery mechanisms (N) ..... Dec. 14 21
Packing, pliable metallic (SP).Aug. 17 75
Pop-up indicating pins (SP)...Sept. 28 75

(A) Abstract. (D) Developments. (DD) Design Digest. (DR) Design Roundup. (Ed) Editorials
(N) Technical News. (P) Perspective. (PD) Product Design. (PV) Points of View.
(RS) Reference Book Sheets. (SP) Significant Parts. (T) Trends in Appearance Design.

Printing equipment-photo typesetting units, wrap-around plates (N) .Sept. 28 25
Radiation-therapy machine (T) Sept. 21 34
Soviet Exhibition report.....July 20 21
Soviet industrial design at the USSR Exhibition, New York. Samuel Scherr (T) .....July 13 34
Speed sensor (SP).....Aug. 24 39
Tape recorder, magnetic, redesigned (T) Aug. 24 36
Tape recorders (T).....July 27 34
Tools lag behind hard-to-machine metals (N).....Nov. 2 19
Transmitter—first 90° uniform-motion transmitter (SP).....Nov. 2 37
West Coast products (T). Jack Meyer July 27 34
Wire, spring (SP).....Aug. 31 51
Writing instruments survey (N) Dec. 14 14

Instrumentation
Angle division tester (N).....July 27 12
Automatic machines are highlight of Paris machine tool show (N)..Oct. 12 37
Automatic slowdown equipment for coiled materials (D).....Sept. 21 9
British show device to 'see' metal service (N).....Oct. 19 28
British up automation by 9% in industry (N).....Sept. 14 38
Combination instrument measures output of very small motors (D) .Sept. 14 36
Czech temperature gage (D)....July 6 33
Data readout (SP).....Nov. 9 105
Document-retrieval device developed (N) .....Oct. 12 40
Instrument measures resinous film and coating hardness (N).....July 13 14
Instrument measures temperature, pressure and strain (D).....Oct. 5 7
Jigmill dial sets the dimensions (PD) July 6 62
Liquid level detectors. T. L. Greenwood (DD) .....Mid-Sept. J534
Mail—semi-automatic letter sorter (T) Oct. 19 40
Mail sorting—more mechanization (N) Oct. 12 40
Measurement milestone reported by NBS (D).....Oct. 5 11
Measuring instrument results displayed on TV screen (D).....July 27 12
Mechanization for translation of world's technical literature (N).....Oct. 12 39
Mobot Mark I—mobile handling mechanism for radioactive areas (N) Sept. 28 26
On-off indicator (SP).....Aug. 31 51
Photoelectric cell for measuring (A) Sept. 28 99
Photoelectric device counts dust specks (N) .....Nov. 30 12
Piston gage for pressures below 0.5 in. hg (A).....Oct. 12 137
Portable fault locator and evaluator (T) .....July 27 34
Pulse-monitoring oscilloscope (D) July 27 12
Radar-like device (N).....July 20 25
Sheet explosive actuates device that protects test equipment (D)..July 6 34
Temperature-sensing device (D) Dec. 14 8
Thermometer, high-temp resistance (N) Nov. 16 25
13 handles for instruments. F. W. Wood, Jr. (DR).....Sept. 14 90
Transmitter timed for year in space (N) .....Nov. 16 21
USSR short on tools for oil industry (N) .....Dec. 28 20
Writing instruments survey (N) Dec. 14 14

Insulation, Electrical
Class B electric-motor insulation (D) Nov. 2 7
Electrical insulating liquids (D) July 6 34
Insulating varnish for small motors (D) July 13 11

Insulation, Thermal
4 ways to improve thermal insulation (N) .....Sept. 7 13
Reactor that uses textiles for thermal insulation (D).....Nov. 23 36

Iron
Ductile iron in the machine tool industry. R. M. Bronson (DD)..Mid-Sept. B65
8 ways to design economy into malleable iron castings. H. L. Kee...Nov. 9 82
Iron-chromium alloys studied to reduce brittleness (N).....Oct. 19 16
Malleable iron at elevated temperature. Marshall & Sommer (DD)..Mid-Sept. B70
When specifying a cast iron. W. H. Moore .....Oct. 12 65

— J —

Joining
Blind riveting (A).....Oct. 12 137
Solders for aluminum joints. W. McQuillan .....Dec. 7 84
Telescoping universal joint (SP) Dec. 14 42

Joining see also **Fastening**

— L —

Linkages
5 linkages for straight-line motion. Sigmund Rappaport (DR)....Oct. 12 86
Steel balls for flexible linkage in camera (PD) .....July 20 52

Lubrication
Automatic lubricator for pressurized stuffing boxes (D).....Dec. 7 40
Bearings, lubricants and lubrication (A) .....Nov. 9 107
Bromofluorine compounds show promise as lubricants (D).....Oct. 5 7
Dry-film lubricants that operate at 1200 F (D).....Oct. 19 8
Fume lubrication for gears (D).Aug. 17 20
Gas-film lubrication (A).....Aug. 17 89
Gear lubrication research and development (A) .....Aug. 17 99
Improved lubricants expected (D) Dec. 21 19
Improved lubricants of the solid-film and dispersion type (D)....Sept. 14 35
Lubricant wetting agents may sap the strength of metals (D).....Oct. 12 36
Lubricating small apparatus (A) Oct. 26 122
Lubricants and friction (A)....Sept. 14 149
New lubricants for 1300 F and above (D) .....Nov. 16 7
Oil mist system (D).....Nov. 30 7
Oil-sump method lubricates motor at higher temperatures (D)....Sept 28 24
Oxygen increases the lubricating ability of sulfurized white oils (D). July 20 19
Quick-change lubricator (SP)..Nov. 9 105
Spherical bearings need no lubricant (N) .....Dec. 21 26

— M —

Machining
Automatic machines are highlight of Paris machine tool show (N).Oct. 12 37
Award-winning lathe bed cuts costs by 35% (N).....Nov. 16 20
British mull quality control issues (N) July 6 40
Cutoff machine—gears control flying knife (PD) .....Aug. 31 36
Design factors affecting machine efficiency. K. O. Tech (DD) Mid-Sept. A32
Drill-pointing machine (T)....Nov. 30 30
Electron-beam machining (DD) Mid-Sept. D176
Electrostatic chuck (PD).....Sept. 28 60
Friction machining receiving new attention in USSR (D).....Oct. 5 8
Machine tools—1960 .....Nov. 23 66
Packaging machinery—mechanisms (N) Dec. 14 21
Russia's mass-produced tools threat to West (N) .....Oct. 12 39
Slots cut and then compressed for uniformity (D) .....Oct. 19 8
Some machine-tool standards approved for "building block" concept (N) Aug. 3 24
Straightening machine (PD)..July 20 53
Tools lag behind hard-to-machine metals (N) .....Nov. 2 19
Weaving machine with chain-cam control (PD) ..... Aug. 31 37
When equipment says it in color. J. L. Seminara.....Sept. 14 67

Magnesium
Magnesium-lithium. D. F. Caldwell Oct. 12 74

Magnets
Magnetic material with high coercive force (D) .....Nov 16 11
Permanent magnets to be more powerful (D).....Aug. 10 9

Management see **Engineering Administration**

Mathematics
Arcs subtended by small angles. M. A. Donohue (RS).....Nov. 9 98
Bevel-gear calculations. B. J. Mumken (RS).....Sept. 14 93
Logarithmic diagrams. Gil Riske Nov. 23 62
Mechanical reliability. R. M. Koff Nov. 16 27

Metals, Ferrous
Damping capacity of metals and alloys (D).....July 6 33
Mechanical properties of metals in design (A).....Oct. 12 137
Metal abundances revised (N)..Oct. 5 14
Nov. 2 13
Primers for metals (D).....Nov. 2 7
Reserve strength in metal parts. D. J. Graziano.....Dec. 21 45
Stress changes electrode potential (N) Sept. 7 12
Thermal separation to purify materials (N) .....Nov. 16 15
Thin, metallic film properties may be radically different (D).....Aug. 24 8
When metals ignite—some sample temperatures (N).....Dec 28 11

Metals, Ferrous see also **Iron and Steel**

Metals, Nonferrous
Beryllium additive improves aluminum alloy (N).....Nov 23 42
Beryllium—high-temperature compounds ready for evaluation (D) Nov. 23 35
Beryllium-nickel alloy performance—new data on performance (D).Dec. 7 39
Brittle materials—what makes them that way? (N).....Aug. 24 14
Compounds sensitive to ultraviolet light (D) .....Sept 28 23
Electrodeposited metal coatings can protect metals from corrosion (N) Dec. 14 15
"Electronic metals" (N).....Nov. 30 13
Fabricating progress reported for beryllium, columbium, titanium (N) July 13 14
Formable high density metal (SP) Dec. 21 73
Gallium replaces mercury in gas studies (N) .....Sept. 21 13
Gold in your product's future (N) Aug. 10 13
Graphite—heat, pressure and radiation effects (N).....Oct. 5 12
Improved way to purify the lower boiling metals (D).....Oct. 5 7
Lithium pays-off in new aircraft alloy (N) .....Nov. 23 39
Magnesium-lithium. D. F. Caldwell Oct. 12 74
Metal abundances revised (N)..Oct. 5 14
Nov. 2 13
Metals for tomorrow. Dr. D. J. McPherson (DD).....Mid-Sept B68
Molybdenum yield point raised by quenching (D).....Oct. 19 8
Nickel, porous (SP).....Aug. 10 53
Oxidation data for columbium and titanium from Norway (N)..Oct. 19 12
Prices (N).....Oct. 5 14
Primers for metals (D).....Nov. 2 7
Reserve strength in metal parts. D. J. Graziano .....Dec. 21 45
Rubies, cultured, for industrial use (D) .....Aug. 31 17
Scandium metzl—precision-cast shapes (D) .....Dec. 14 8
Stress changes electrode potential (N) Sept. 7 12
Tantalum, high-purity, at less than $20 a lb (D).....Sept. 28 23
Thermal separation to purify materials (N) .....Nov. 16 15
Thin, metallic film properties may be radically different (D).....Aug. 24 8
Tungsten—large forged tungsten parts (SP) .....Dec. 28 29
Tungsten workability increased by alloying (N).....Oct. 19 16
Vanadium—high-strength alloys (D) Nov. 2 7
When metals ignite—some sample temperatures (N).....Dec. 28 11
Zirconium alloys with greater strength and heat resistance (D).....Dec.7 39

Metals, Nonferrous see also **Aluminum, Copper, Magnesium, Titanium**

Meters
Continuous-reading meter (SP) July 20 73
Flowmeters compensate for variations in density (D).....Dec. 21 19
Manometers—theory and application (DD) .....Mid-Sept. A36
Micrometer measures to 0.00001 in. (PD) .....July 6 65
Thermocouple anemometer (D)..Sept. 7 10
Variable-area flowmeters (SP).Nov. 16 37

Missiles
Atlas—5 consecutive failures and the answer (N).....Aug 31 20
Atlas ICBM has no design problems—Pentagon (N).....July 13 30
Forecasts of aircraft and missile needs (N) .....Aug 10 13
Launcher steers self to exact spot (PD) .....Sept. 28 37
Mobile missile launcher (N)..Sept. 21 22
Solid-propellant fuel supplies hot gas that runs servo (PD).....Aug. 31 35

Mobile Equipment
Army field equipment undergoing major changes (D).....Oct. 5 11
Concrete mixer (T).....July 27 35
Harvester tilts to stay on the level (PD) .....Oct. 12 72
Motor scooter—smoother drive without gears (PD).....Dec. 7 67
Remote-controlled vehicles all over the world (D).....July 13 11
Seagoing vehicles uses industrial components (PD).....Sept. 14 76

(A) Abstract. (D) Developments. (DD) Design Digest. (DR) Design Roundup. (Ed) Editorials.
(N) Technical News. (P) Perspective. (PD) Product Design. (PV) Points of View.
(RS) Reference Book Sheets. (SP) Significant Parts. (T) Trends in Appearance Design.

SNO-CATS (N)....Dec. 7 42
"Terra-tires" on marsh buggy (N) Nov. 30 26
Tractor driven by fuel cells (N) Nov. 2 19
Tractor equipped with power shift transmission (N)....Oct. 5 24
Tractor from Israel (T)....Aug. 10 46
Trailer pushes as tractor pulls (PD) Aug. 3 47

Models
Cast epoxy models. A. W. Wakeman Dec. 21 60
Clay models will shape your ideas. J. F. Reis....Oct. 12 68
Fluid-flow models predict design performance. Putnam & Ungar..Aug. 17 64
Structural models—they preview stress and strain—report....Oct. 26 55
Pt. I Theory of similitude. Dr. R. Simon....Oct. 26 56
Pt. II Building the better model R. G. Carlson....Oct. 26 59
Pt. III The model at work. C. W. Bert....Oct. 26 61

Molding
Molding glass reinforced parts (DD) Mid-Sept. D177
Permanent-mold castings. W. A. Hamilton....Aug. 31 40

Motors
Ac motors for adjustable-speed systems (A)....July 6 117
Air-operated motor features rack-and-pinion system for control (D) Aug. 17 19
Applying differential equations to induction-motor transients (A) July 20 123
Battery-powered motor. W. M. L. Rogers....Oct. 12 62
Braking circuit for synchronous motors (D)....Aug. 3 19
British motor for vibrating devices (D)....Nov. 30 9
British standard for flameproof electric motors (D)....Sept. 28 24
Combination instrument measures output of very small motors (D) Sept. 14 26
Dc torque motor (SP)....Dec. 14 43
Driven sheave retains speed (SP) Sept. 21 39
Four ways to stop a motor. C. H. Buchanan....July 6 80
Fractional-horsepower motors conform to American and British standards (D)....July 6 24
High-accuracy stepping motor (SP) Nov. 30 37
High-efficiency, low inertia miniature dc motors (D)....Sept. 7 9
Linear positioning motor (SP)..Nov. 30 37
Magnetic motor starters (SP)..Sept. 28 73
Matching drives to loads. M. H. Fisher (DD)....Mid-Sept. H428
New bearing assembly for vertically mounted motors (D)....Sept. 28 24
Prediction of induction-motor performance. C. C. Libby....Dec. 21 42
Servomotor modifications to increase flexibility. S. A. Davis (DD) Mid-Sept. H421
Shaded-pole motor—how it performs. Truba & Webber....Nov. 9 92
Silicones in enclosed dc motors can produce abnormal brush wear (D) Aug. 31 18
Simplifying motor power-factor correction (A)....Dec. 7 138
Step motor uses two armatures (PD) Sept. 14 77
Stepping motors (N)....July 20 23
Synchronous motor torques defined (A)....Nov. 9 167
Synchronous motors ½ the size and 1/10 the cost (D)....Nov. 23 35

— N —

Noise
Acoustic fatigue characteristics of aluminum panels (A)....Sept. 28 99
Acoustical shell sound suppressor developed for gas turbine (N)..Oct. 26 41
Psychology of sound (A)....Oct. 26 122

Nucleonics
Acoustoelasticity—from ultrasonics a new stress-analysis technique. Benson & Raelson....July 20 56
Airplane, nuclear-powered (D)..Aug. 10 10
A-plane—engineers lose to scientists July 13 21
Barriers that will break: protection by sacrifice (N)....Aug. 10 12
Battelle opens doors to private irradiation (N)....Dec. 28 20
Bootstrap reactor will make its own fuel (N)....Sept. 7 12
Bootstrap reactors on the way (N) Sept. 21 12
British may replace Zeta machine (N)....Aug. 3 22
Materials: key to reactor costs (N) Dec. 28 11
Mercury gives liquid radiation shield for A-powered spaceships (D) Aug. 17 19
Metallo-ceramic powders made by radiation (D)....July 13 11
Mobot Mark I—mobile handling mechanism for radioactive areas (N) Sept. 28 26
Nuclear-powered fuel cells (D)..Aug. 17 20
Nuclear-process heat reactors (D) Dec. 7 39
Packaged "portable" nuclear reactors (D)....July 13 9
Pictures of sound at ultrasonic frequencies (N)....Sept. 7 12
Point-source gamma-ray standards issued (N)....Nov. 30 29
Power unit of tomorrow is nuclear (N)....Aug. 24 30
Radiation protection afforded by homes studied (D)....July 27 10
Radioisotope monitoring devices (D) Aug. 31 17
Reactor fuel elements cast in vacuum (N)....Nov. 2 22
Reactor that uses textiles for thermal insulation (D)....Nov. 23 36
Reactor to help power ionic-propelled spacecraft (N)....Aug. 10 26
R&D duties urged on industry (N) July 27 28
Six ways to find an atom (N)...Oct. 5 12
Skipjack—Navy's newest nuclear submarine....Oct. 26 115
Soviet thermonuclear research tools shown in New York (N)....July 13 13
Submarines—more millions awarded for nuclear subs (N)....Dec. 14 20
Technical men urged to rally public opinion against A-tests (N)..Sept.14 42
Ten-year light bulb that requires no outside power source (D)....Nov. 23 36
Thermoluminescent materials provide new route to radiation detection (D) Aug. 31 18
Ultrasonics applications—cost is the big obstacle (N)....Dec. 14 14
Ultrasonic measurement (SP)...Aug. 24 39
Ultrasonic measurement of corrosion (A)....Dec. 21 99
Ultrasonics—what ultrasonics can do —and can't (N)....July 13 13

— P —

Paper
Elongates in all directions (D)..Dec. 14 3

Patents
Canadian government patents available for licensing (D)....Aug. 10 9
Congress probes patent rights (N) Dec. 7 45
More liberal government patent policies likely (D)....Dec. 28 9
NASA may change patent policy (N) Sept. 7 25
NASA new patent regulations seem assured (D)....Dec. 14 13
New series of government patents to be available (D)....Sept. 7 10
The paradoxical idea-graph (EA) Dec. 28 15
Strategic Industries executive charges US usurps patent rights, slows defense (N)....Nov. 2 21
U. S. Patent Office—where ideas go begging. R. M. Koff....July 13 26

Photography
Camera, tape recorder show driver errors (N)....July 13 23
Camera uses steel balls for flexible linkages (PD)....July 20 52
Double exposure highlights motion (N)....Dec. 28 10
Eccentric drive speeds shutter action (PD)....Nov. 23 71
Faster photographic films are electrically sensitive (D)....Nov. 9 36
High-speed color film to record tech data (N)....Oct. 19 23
Magic lantern throws data on colors and 3-D (PD)....Dec. 21 50
Movie projector—complex casting—but simplifies projector design (PD) Dec. 7 68
Photoelectric device counts dust specks (N)....Nov. 30 12
Pictures of sound at ultrasonic frequencies (N)....Sept. 7 12
Reproducer—from camera to master to copy (N)....Oct. 26 40
X-ray fluoroscope based on electronic image (N)....Oct. 19 14

Piping
Heated rubber pipe (SP)....Aug. 10 53

Plastics
Applications—the possibilities multiply (N)....Aug. 24 14
British plastics look better now (N) July 27 31
Call for more plastics standards, handbooks (N)....Nov. 2 22
Cast epoxy models. A. W. Wakeman Dec. 21 60
Designing with rigid polyvinyl chloride. Batiuk & Rolls (DD)....Mid-Sept C115
Dual service materials, wet on one side, dry on the other (D)....Aug. 31 18
Epoxy, shock-resistant (SP)....Dec. 7 97
Epoxy resins with greater thermal stability (D)....Sept. 28 24
Evaluation center sponsored by Defense Dept. (N)....Dec. 21 25
Fastening of glass reinforced plastics. M. D. Weiss (DD)....Mid-Sept. G368
FTC proposes fluorcarbon standards (N) Dec. 28 19
Fiberglass pressure vessel (N)..Oct. 26 41
Filament-winding grows up. DeBusk & McCarthy....July 20 46
Flat-reinforced plastic springs. L. A. Heggernes....Nov. 9 74
Foreign car-designers outstrip U. S. in pounds of plastic per car (N) July 6 35
Germany's new bid for leadership—a plastics industry comes alive again (N)....Nov. 23 37
High temperature behavior of reinforced plastics. I. J. Gruntfest & others (DD)....Mid-Sept. C120
High-temperature polymers (N) Sept. 7 13
High-temperature reinforced plastics. L. H. Shenker....Nov. 23 58
High-voltage conductor life improved with plastics (N)....Nov. 16 15
How light affects plastics and their protectors (N)....Dec. 14 14
Impact and shock resistance tester (N) July 27 15
Linear polyethylene will replace steel for 1960 Ford side-shields (D)..Aug. 3 19
Meshed plastics that look like expanded metal (D)....Dec. 28 8
New resins for service at 500 F (D) Sept. 7 7
New source of erosion (D)....Sept. 14 35
1960 plans for plastics to include new producers (D)....Dec. 14 8
Nylon—oriented nylon strip for conveyor belting (D)....July 20 20
Nylon dam, collapsible, controls river (N)....July 6 39
Nylon gears in sizes to 2 ft. (D) Aug. 10 7
Nylon and polyethylene—improved electrical properties and moisture resistance (D)....July 13 9
Nylon resin spur gears. Hall & Alvord (DD)....Mid-Sept. E204
Plastic foams developed for impact cushioning (N)....Aug. 3 24
Plastic pipe machinery will be shipped to Russia (N)....Sept. 14 40
Polyester premix molded parts. Doyne & Feuer....Oct. 12 76
Polyethylene connectors (N)...Dec. 14 15
Polymers that can serve as semiconductors (D)....Aug. 3 19
Polymers with long-time stability at 1000 F (D)....July 13 9
Polypropylene heads for the big time (N)....Oct. 26 38
Porous plastic in sheets and tubes (D)....Nov. 2 9
Porous plastic (D)....Sept. 14 36
Producing special properties in epoxies with fillers (A)....Sept. 28 99
Resin-bonded quartz sheet (SP) Dec. 21 73
Soviet plastics (N)....July 20 22
Structure foil (A)....Nov. 23 135
Teflon—fillers for the latest Teflon. W. B. Watkins....Sept. 28 52
10-tube tapes of vinyl (SP)....Dec. 14 43
Three new epoxies join the pre-preg laminates. J. L. Welch....Aug. 31 38
Time-dependent mechanical properties of plastics (A)....Aug. 17 99
Transparency can be increased (D) Oct. 5 7
Urged to slow down for data organization (N)....Dec. 14 15
When resins won't stick check for impurities (N)....Sept. 7 13

Plating
How to design for better plating (DD) Mid-Sept. 124
Improved chrome plate—better die-castings (N)....Nov. 30 27
Nickel plating directly on aluminum (D)....Nov. 16 11
12 special electroplates—their uses, properties and costs. P. C. Noy (RS) Oct. 12 89

Pneumatics
Assembly and operation of air circuits Philip Hall (DD)....Mid-Sept. J530
Basic designs in fluid-power circuits (DD)....Mid-Sept. J538
Portable air-oil booster—pneumatic power for hydraulic tools (PD) Aug. 3 46
Pressure losses in pneumatic systems. Gil Riske....Oct. 26 80

Powder Metallurgy
Bearing liners from powder metal (D) Nov. 16 11
Jet of water streamlines production of copper-lead bearing powder (N) Aug. 3 22

(A) Abstract. (D) Developments. (DD) Design Digest. (DR) Design Roundup. (Ed) Editorials. (N) Technical News. (P) Perspective. (PD) Product Design. (PV) Points of View. (RS) Reference Book Sheets. (SP) Significant Parts. (T) Trends in Appearance Design.

Metallo-ceramic powders made by radiation (D).....July 13 11
Top trio in metal powder competition (N).....Aug. 24 27

Power Sources
"Direct" conversions systems (D) Dec. 21 20
Fuel cell, nuclear powered (D) Aug. 17 20
Fuel cell licensing under sharp attack (N).....Sept. 7 28
Fuel cells, high temperature (D) Sept. 14 36
Novel power sources (D).....Dec. 28 7
Power unit of tomorrow is nuclear (N) Aug. 24 30
Solar furnace can be a source of cool light (D).....Sept. 21 7
Solar power—'Big Bertha' beams solar power (N).....Nov. 30 27
Synthesize elements for power sources (N).....Nov. 30 12

Presses
Automate press (DD).....Nov. 23 72
East German design (T).....Oct. 5 44
Giant shell-extrusion press (N) Nov. 9 39
Pneumatically operated press (T) Aug. 24 37
Tape-controlled turret punch press (N).....**Oct. 19 31**

Printed Circuits
Are printed circuits oversold? (PV) Sept. 7 42
14th Institute of Printed Circuits—experts debate problems (N)..Nov. 2 20
Honeycomb beefs up printed-circuit panels (N).....Sept. 14 41
Printed circuit boards simplify maintenance and servicing (N)....Nov. 9 42
Soviet exhibits (N).....July 20 23

Product Planning
Cooperative research advances engineering knowledge.....Aug. 24 27
Does your product deserve an award? Dec. 7 82
Engineering in the evolution of products (A).....Sept. 14 149
50 engineering reasons why not (Ed) July 20 45
How America influences European product development. Peter Muller-Munk (T).....Dec. 14 36
How effective are committees in product planning? (PV).....July 27 36
How to measure engineering progress . . .
in an engineering department, J. J. Lahm
in a service group, R. F. Koenig Sept. 7 32
Selling attracts interest of industrial designers (N).....Nov. 23 39
Soviets seek better consumer products (N).....Nov. 23 40
The yardsticks fo research success. A. A. Lytle.....Oct. 19 24

Publisher's Postscript
Atom-powered bottles.....Aug. 24 48
Editorial blushes.....Nov. 30 44
Engineering with glamor.....Aug. 10 66
Firefighters .....July 27 48
For your reference file.....Dec. 14 56
Googols and googoplexes.....Sept. 21 48
The ideal ad.....Oct. 5 60
Medicine for the doctor.....Oct. 19 60
Published for always.....Sept. 7 52
Teamwork takes a prize.....Nov. 16 48
What they read and why.....Dec. 28 36
Who pays for your dinner?....July 13 52

Pumps
Air-operated free-piston pump (SP) July 13 43
14 identical pistons in simplified pump (PD) .....Nov. 9 80
High-pressure, low-flow pump (SP) Aug. 2 62
Hydraulic pumps (D).....Dec. 28 7
Industry seeks fluids, pumps for Mach-3 (N).....Dec. 14 26
Miniature rotary air pumps (D)..Oct. 5 7
Pinch-effect pumping can create 1mm Hg vacuum (D).....Dec. 14 11
Reciprocating pump—oil drives water for high pressures (PD)....Dec. 21 49
Tandem hydraulic pump (SP)..Oct. 26 87
2¾-in-ID pump has 10-gpm flow rate (SP) .....Nov. 2 37

— R —

Radio and Television
British altimeter undergoing FAA tests (N) .....Nov. 30 29
East German TV set (T).....Oct. 5 44
Education television broadcasting (N) Nov. 2 21
Navy's giant telescope design..Nov. 16 19
Printed circuit boards simplify maintenance and servicing (N).....Nov. 9 42
Sturdy TV minimizes maintenance time (PD) .....Nov. 9 77

Relays
Close differential relay (SP)...Oct. 12 93
Miniature, hermetically sealed low-current switching relay (D)....Oct. 19 11
Rotary stepping relay (SP).....Nov. 23 97
$25-million R&D need for electrical relay industry (N).....July 6 39

Research
Ablation materials (A).....Dec. 7 138
Air pollution—US seeks more funds for R&D (N).....July 13 32
ASME reports application of scientific findings in US "slow as molasses" (N) .....Sept. 14 42
Army Ordnance encourages industry's help .....Sept. 7 23
Basic military research spending (D) Oct. 5 11
Century 21 Exposition—name change ok'd (N).....Aug. 31 22
China drives toward her own technology. Sanders & Kolb.....Dec. 28 24
Congress says Army, Navy not getting their share of R&D money (N) Sept. 28 27
Cooperative research advances engineering knowledge.....Aug. 24 27
Corporate R&D thrives near college scholars (N).....Nov. 30 26
Creativity . . . the facts behind the fad. E. J. Tangerman.....Aug. 24 20
Creativity is a will-o'-the-wisp (Ed) Aug. 24 19
Crystal specimen purest ever (N) Nov. 23 40
Earth center is a lot cooler than thought (N).....Nov. 16 13
Film research reduces computer size (N) .....Nov. 16 22
Free radicals look less promising for space propulsion (N).....Oct. 19 14
Frozen blood program sparks heat transfer (N).....Nov. 9 40
Fuel performance research (N)..Nov. 2 12
GE tops US listing of R&D contracts (N) .....July 13 32
Germans boost R&D allotments (N) Aug. 10 24
Graphite with low ash content (D) Aug. 10 7
Industry spend most R&D money in aircraft, electronics (N).....Sept. 21 23
Japan's Science Council and government dispute handling of non-industrial R&D (N).....Sept. 14 37
Japanese deplore slow research growth (N) .....Sept. 7 25
Japanese establish Science and Technology Foundation (N).....Nov. 16 23
Krypton 85 as static eliminator (D) July 20 30
Los Angeles smog-fighters battle to clear the air (N).....July 6 37
Mechanization for translation of world's technical literature—first step (N) Oct. 12 39
Microanalysis applied to manufactured products (N).....Oct. 5 12
1960 budget for R&D, hardware (D) Nov. 2 11
OEEC launches metal fatigue R&D program (N).....Aug. 17 23
OTS updates abstracts, adds new USSR titles (N).....Aug. 31 22
Oxygen from air by chemical process (N) .....Nov. 16 12
Price of R&D: $2 billion in contract cancellations (D).....Sept. 21 11
Process-oriented R&D available to industry (N).....Nov. 16 25
Profitable research planning. R. T. Race (DD).....Mid-Sept. A35
The quality copyist (Ed).....July 13 19
R&D duties urged on industry (N) July 27 28
Research management (A)....Nov. 23 135
Sea water conversion plant contracts expected to be let before next June (D) .....July 27 10
Sea water freeze plant now in operation (N) .....Oct. 26 38
Sea water to fresh water conversion pushed by government (N)..July 13 29
Submarine, unmanned, views ocean flour (N).....**Aug. 24 31**
Submarines—more millions awarded for nuclear subs (N).....Dec. 14 29
Sulfides: new route to high-temp materials (N).....Nov. 2 13
Supercritical gases may be used as super solvents (N).....Aug. 10 12
Theories are nets (Ed).....Sept. 14 65
Thermoluminescence—dating technique for previously fired objects (N) Nov. 2 12
$25-million R&D need for electrical relay industry (N).....July 6 39
Ultra hi-temp materials sought (N) Aug. 17 23
US raises R&D budgets by 12% in '59 (N) .....Sept. 28 29
US science position described as 'poor' (N) .....Oct. 19 26
US-UK to cooperate in space exploration (N).....Aug. 10 30
"Unwanted" information in communication slated for study (D)...Sept. 7 7
Vacuum studies may not apply to outer space conditions (N).....Aug. 10 12
What's par? (Ed).....July 27 19
Wood that stops neutrons (D)..Nov. 30 9
The yardsticks for research success. A. A. Lytle.....Oct. 19 34

Rubber and Elastomers
Comparison of rubber properties (DD) Mid-Sept. C112
Design and fabrication of extruded rubber products. G. W. Beck (DD) Mid-Sept. D164
Heated rubber pipe (SP).....Aug. 10 53
High-strength silicone rubber (SP) Oct. 19 49
Natural rubbers—a glossary of terms (N) .....Oct. 5 14
New types help synthetic rubbers in drive to big lead over naturals (N) Dec. 7 43
Polyethylene rubber (D).....July 20 19
Silicone rubber compounds (SP) July 13 43
Silicone sponge rubbers (SP) ..Aug. 17 75
"Terra-tires" on marsh [illegible]ty (N) Nov. 30 26
Today's diaphragms—coat [illegible] and fabrics. E. C. Hemes.....Oct. 26 68

— S —

Safety
Camera, tape recorder show driver errors (N).....July 13 23
Flameproof the product. A. R. Gardner .....Aug. 3 35
New safety devices needed (D)..Oct. 12 35
Open-type relief valves do not constitute a hazard (D).....**Aug. 3 20**
Reduced factors of safety (D)..Oct. 26 35
Reliability of mechanical components (D) .....Nov. 2 7
What happened to "fail safe"? (Ed) Nov. 2 17

Sandwich Structures
Chem-milling cuts cost as it contours honeycomb (N).....Oct. 19 21
Honeycombs crush better than foamed plastics (D).....Dec. 21 20
6 basic design suggestions for brazed honeycomb sandwich. F. F. Rechlin (DD) .....Mid-Sept. G375

Seals
Durbo lockwasher (N).....Dec. 28 17
Fuel line sealants will work at 700 F (D) .....Nov. 30 7
Heavy-duty static seals (SP)...Oct. 12 93
Hermetic rotary shaft seal (SP) Oct. 12 93
Magnetic shaft seals (D).....Oct. 12 36
Mechanical seal (D).....Oct. 26 35
Oil-seal design is getting a thorough going-over (D).....Nov. 16 7
Oil seal has wear sleeve (SP)..Nov. 9 105
Sealants for fluid control. W. M. Langton (DD) .....Mid-Sept. J541
Self-contained shaft seal (SP)..Dec. 7 97
16 unusual applications for the O-ring. J. F. Machen (DR).....Nov. 23 91

Semiconductors
Automatic production predicted (N) Aug. 17 23
NEMA and EIA join forces, divide field (N).....Aug. 17 22
New polymers that can serve as semiconductors (D).....Aug. 3 19

Soldering
Induction de-solder and solder device (N) .....**Aug. 31 23**
Methods of soldering aluminum. Charles Bruno (DD).....Mid-Sept. G372
Solders for aluminum joints. W. McQuillan .....Dec. 7 84

Space Technology
Cornell scientists aim for space heat relief (N).....Oct. 19 30
Double-purpose space test rig (N) Dec. 7 44
Food in space: engineers' problem (N) Nov. 2 12
Four-way-combination materials for structural applications (N)..Nov. 16 15
Free radicals look less promising for space propulsion (N).....Oct. 19 14
Gas bearings guide satellites into space (N) .....Nov. 9 41
German report describes Soviet rocket guidance (N).....Oct. 5 24
Reactor to help power ionic-propelled spacecraft (N).....**Aug. 10 26**
Scout research vehicle and launcher (N) .....Aug. 10 26
Self-help space systems (D)...Nov. 23 36
Strange problems of space (N)..Oct. 19 14
To keep US in space: shopping list July 27 23
US still lags Soviets in space while Federal red tape prevails (N)...Oct. 26 39
US-UK to cooperate in space exploration (N).....**Aug. 10 30**
Vacuum studies may not apply to outer space conditions (N).....Aug. 10 12

(A) Abstract. (D) Developments. (DD) Design Digest. (DR) Design Roundup. (Ed) Editorials.
(N) Technical News. (P) Perspective. (PD) Product Design. (PV) Points of View.
(RS) Reference Book Sheets. (SP) Significant Parts. (T) Trends in Appearance Design.

Springs
Finishes for springs (A).....July 6 117
Flat-reinforced plastic springs. L. A. Heggernes .....Nov. 9 74
Glass-fiber sleeve-spring for high energy absorption. Dr. K. Maier....Aug. 17 60
Heavy-duty spring mounting (D) .....Nov. 2 9
Liquid springs save space. L. M. Polents .....Aug. 17 54
7 applications for the constant-force spring. H. E. Nankonen (DR) .....Dec. 7 90
Stress and stiffness nomograms for helical springs. J. F. Waters (DD) .....Mid-Sept. F292
Torsion-free cylindrical measuring springs (D).....Aug. 3 20
29 ways to fasten springs. Federico Strasser (DR).....Dec. 21 66

Stamping
Facts about stampings (DD).Mid-Sept. D170

Standardization
British standard for flameproof electric motors (D).....Sept. 28 24
China adopts metric system (N) .....Aug. 3 24
Cylinder manufacturers standardize dimensions (N).....Nov. 9 41
Defense Dept. OK's standardizing manuals (N).....Dec. 14 30
Design advantages of new standards for involute splines. L. N. De Vos .....Mid-Sept. E208
Electronic standards for industrial equipment (DD).....Mid-Sept. I470
FTC proposes fluorocarbon standards (N) .....Dec. 28 19
Lack of measurement standards challenges critical weapon reliability (N) .....Sept. 7 26
Metric change—lawmakers go slow (N) .....Sept. 14 40
NBS extends calibration service (N) .....Sept. 7 28
NEMA and EIA join forces, divide field (N) .....Aug. 17 22
New standard for atomic weight will affect calculations (D).....Aug. 3 20
Point-source gamma-ray standards issued (N).....Nov. 30 29
Some machine-tool standards approved for "building block" concept (N) .....Aug. 3 24
Standard meter to be based on wave lengths next year (N).....July 27 14
Standards awry abroad (N).....July 20 25
10th Annual National Conference of Standards—lightwave, drafting and metric standards get most attention (N) .....Nov. 9 38
Tighter thickness specifications for sheetmetal (D).....Dec. 7 40

Statistical Control
Experiments that have statistical certainty. W. J. Hill.....July 6 66
Multi-variable experiments. W. J. Hill .....Dec. 21 56
Regression analysis digs out equations from scattered data. W. J. Hill .....July 20 62
Statistics cut costs, time of R&D (N) .....Sept. 28 27

Steel
Aluminum to replace steel (N).Dec. 28 11
Chemical coatings protect steel surfaces when heat-treating at high temperatures (N).....Oct. 26 38
Effect of stress cycling on static properties of SAE 4340 steel (A)..July 20 123
Hardening process increases strength, retains ductility (N).....Oct. 26 37
Imports may exceed exports this year (N) .....July 13 14
Microporosity and ductility of steel castings (D).....Sept. 21 9
New way to evaluate sheet steel .....Oct. 26 54
Shock strength higher than expected (N) .....July 27 15
Stainless steel strip (SP).....Oct. 19 49
Stainless steel ups life of mufflers (N) .....Nov. 23 39
Steel by slipstick or slapstick (A) .....Aug. 3 83
Steel coils are precoated (SP)..Oct. 19 49
Strike pushes much capital spending into 1960 (N) .....Nov. 30 25
Ten uses of stainless steel wire. R. J. Berkol (DD) .....Mid-Sept. B74
Thermal fatigue of martensitic steel at 1150 F (N) .....Dec. 14 15
Work-hardened sheetmetal. H. A. Jahnle .....Oct. 26 76

Stress Analysis
Acoustic fatigue characteristics of aluminum panels (A) .....Sept. 28 99
Acoustoelasticity—from ultrasonics a new stress-analysis technique. Benson & Raelson .....July 20 56
Crack initiation and propagation in aluminum sheet (A) .....Aug. 3 83
Deflection of asymmetric beams (A) .....Dec. 21 99
Effect of stress cycling on static properties of SAE. 4340 steel (A) .....July 20 123
Finding stresses in a pressure-vessel head. R. E. Wong.....July 6 67
Flat reinforced-plastic springs. L. A. Heggernes .....Nov. 9 74
How to find stresses and deflections in spoked-bearing-supports. Lawrence Berko (RS) .....July 6 79
Impact fatigue strength (A)..Sept. 28 99
Key to fatigue failure of metals at elevated temperatures (D).....July 20 30
Load-strain factors on alloys can now be tested (N) .....Dec. 14 24
Mechanism of thermal fatigue (A) .....Sept. 14 149
Minimum screw-lengths for tapped holes. Gil Riske (RS).....Sept. 28 69
New way to evaluate sheet steel .....Oct. 26 54
OEEC launches metal fatigue R&D program (N) .....Aug. 17 23
Reserve strength in metal parts. D. J. Graziano .....Dec. 21 45
7 moment formulas for rectangular frames. George Detko (RS)..Nov. 23 93
Shaft torque: charts find equivalent section. Dr. B. N. Ghosh (RS).Aug. 31 47
Strain measurements under boiling water simplified (N) .....Oct. 26 37
Stress changes electrode potential of copper, gold and other metals (N) .....Sept. 7 12
Stress and stiffness nomograms for helical springs. J. F. Waters (DD) .....Mid-Sept. F292
Structural models—they preview stress and strain—report .....Oct. 26 55
Pt I Theory of similitude. Dr. R. Simon .....Oct. 26 56
Pt II Building the better model. R. G. Carlson .....Oct. 26 59
Pt III The model at work. C. W. Bert .....Oct. 26 61
Surface fatigue is the most common cause of gear failure (D)...July 20 20
Survey method evaluates residual stresses in gears. Bergquist & Lenhoff .....Sept. 14 84
Thermal fatigue may not be a serious design hazard (D).....Nov. 9 36
Thermal fatigue of martensitic steel at 1150 F (N).....Dec. 14 15
Titanium—stopping creep (N).Nov. 30 13
Variables affecting brittle coating in stress analysis. Dally & Durelli (DD) .....Mid-Sept. F302

Switches
Ac static switch designed (N)..July 20 25
All-metal machined switch (SP) .....July 13 43
Cam-actuated snap switch (SP).July 6 83
Electro-ionic device switches full ac sine wave (SP).....July 27 38
Electronic limit switch (SP)..Aug. 31 51
Fail-safe proximity switch (SP) .....Nov. 16 37
In-line pressure switch (SP)....Oct. 26 57
Miniature cam switch (SP).....Aug. 17 75
Miniature rotary selector switch (SP) .....Dec. 7 97
One-way mercury switch (SP).July 13 43
Pressure-actuated multicontact switch (SP .....July 27 39
Rotating cam limit switch (SP).Dec. 7 97
Solid-state switches. T. P. Sylvan (DD) .....Mid-Sept. I474
Three-circuit limit switch (SP).Aug. 3 63

Tangents
Anatomy of a snitch.....Nov. 23 132
Design for Christmas.....Dec. 7 135
Did Popov invent radio?.....Oct. 12 124
Valley of precision.....Nov. 9 154
Walking on two legs.....Sept. 14 136

Telephone
Hotel telephone (T).....Aug. 24 37

Terminology
Modern message from Garcia (Ed) .....July 6 53

Testing
British radio altimeter undergoing FAA tests (N).....Nov. 30 29
Cooling unit for radar receiver-transmitters (N) .....Oct. 5 24
Crimp tester (D).....Oct. 26 36
Current-path verifier for bomber's complex wiring (N).....Nov. 9 38
Double-purpose space test rig (N) .....Dec. 7 44
Dynamic tool for testing (N)..Nov. 30 26
Experiments that have statistical certainty. W. J. Hill.....July 6 66
Flameproof the product. A. R. Gardner .....Aug. 3 38
Gallium replaces mercury in gas studies (N) .....Sept. 21 13
Gas thermal conductivity measured at high temperature (N).....Aug. 24 13
High-pressure air. Chadwick & Brady .....Sept. 14 71
How much reliability? (Ed)....Oct. 12 61
Hydraulic multiplier checks load cells (PD) .....July 20 54
Impact and shock resistance tester for plastics (N) .....July 27 15
Instrument measures temperature, pressure and strain (D).....Oct. 5 7
Liquid density measured by vibration of unbalanced rotor (D).....Aug. 24 8
Liquid-level detector for ultralow temperatures (D).....Dec. 28 7
Load-strain factors on alloys can now be tested (N).....Dec. 14 24
Low-energy spark discharges to be studied (D) .....Sept. 28 24
Measuring instrument results displayed on TV screen (D).....July 27 12
Mechanical reliability. R. M. Koff .....Nov. 16 27
Minus 458 F used for component testing (N) .....Sept. 7 26
Molybdenum yield point raised by quenching (D) .....Oct. 19 8
Multi-variable experiments. W. J. Hill .....Dec. 21 56
New way to evaluate sheet steel .....Oct. 26 54
Oxidation data for columbium and titanium from Norway (N)..Oct. 19 16
Performance of ball bearings. B. L. Mims .....Sept. 14 78
Quick test for light metals (N).Nov. 9 41
Radiation protection afforded by homes studied (D) .....July 27 10
Relativity theory still has no experimental proof (N).....July 27 14
Rocket motor simulator to test structures, insulators (N).....Aug. 10 12
Rocket-ramjet engine combination tested (N) .....Nov. 30 26
Sheet explosive actuates device that protects test equipment (D)..July 6 34
Simulators measure abrasion resistance .....Standard machines test candidates quickly. D. Gardner.....Nov. 9 70
Abrader custom-built for a special job. S. Bortas.....Nov. 9 72
"Solid" gas used in thickness gages, nuclear batteries (D).....Aug. 24 7
Soviet exhibition of test equipment (N) .....July 20 24
Surface temperature elements measure to 0.1% of range (D).....Dec. 14 8
Survey method evaluates residual stresses in gears. Bergquist & Lenhoff .....Sept. 14 84
Testing for research, design and improvement (A) .....Oct. 12 137
Thermal analysis for tests of materials, processes (N) .....Nov. 16 13
Vibration-test system (N).....Aug. 3 22

Textile
Crimp tester (D) .....Oct. 26 36
Vycron—tough new fiber (N)..Aug. 24 14

Timers
High-current timer (SP).....Oct. 5 51
Panel-mount interval timer (SP).Oct. 5 51
Plugboard program timer (SP).Oct. 26 57
Transistor-equipped timer (SP).Nov. 23 97

Titanium
Alloys continue air-frame service to Mach 3 (N).....July 27 15
Brazing alloys in foil form (D).Oct. 5 8
Can be used at friction points (D) .....Nov. 9 35
Cold crucible answers titanium-melt problems (N) .....Nov. 23 38
Gears (N) .....Aug. 24 31
Oxidation data from Norway (N) .....Oct. 19 16
Stopping titanium's creep (N)..Nov. 30 13
Strengthened by metal-fiber reinforcements (D) .....Nov. 16 7
Titanium carbide in hi-temp bearings (D) .....Oct. 26 36
Top operating temperature climbs (D) .....Oct. 19 11

Tolerances
Aluminum forgings for precision tolerances. Erhard & Krajewski..Aug. 17 51
Metal-removal method for closer tolerances (N) .....Aug. 10 27
Tighter investment-cast tolerances. H. Matthieson .....July 20 49
Tolerances clarify design intent (A) .....Dec. 7 143

Transducers
Conversions that measure—a review of available transducers (N)...Sept. 21 13

Transistors
Design and construction of transistors. Lenz & Cook (DD).....Mid-Sept. I472
Increase reliability (D).....Nov. 23 35
Transistors—the 6 basic types. Harry Goff .....Aug. 3 42

Transmission
Comparison of belts, chains, gears. E. E. Cheaney & others (DD) .....Mid-Sept. E210
Design advantages of new standards for involute splines. L. N. De Vos .....Mid-Sept. E208

(A) Abstract. (D) Developments. (DD) Design Digest. (DR) Design Roundup. (Ed) Editorials. (N) Technical News. (P) Perspective. (PD) Product Design. (PV) Points of View. (RS) Reference Book Sheets. (SP) Significant Parts. (T) Trends in Appearance Design.

Miniature transmission (SP)..Nov. 16 37
Motor scooter—smoother drive without gears (PD) .....Dec. 7 67
Tractor equipped with power shift transmission (N) .....Oct. 5 24
Transmission for machine tool drives (SP) .....Dec. 14 43

Tubes, Electron
Silicon carbide crystal feeds tube its electrons (N) .....Aug. 17 24

Tubing
Cheaper way to weld tubes. Helmut Thielsch .....Dec. 21 54
Inflatable metal tubing (SP)..Aug. 10 53
Perforated zippered tubing (SP) Nov. 30 37

— V —

Vacuum Melting
Reactor fuel elements cast in vacuum (N) .....Nov. 2 22

Valves
Cartridge-type check valve (SP) July 20 73
Control valves use poppet (SP)..July 6 83
Disk-type check valves (SP)...Oct. 12 93
Five-inch Y-pattern valve (N)..Oct. 19 16
Four-way solenoid air valves (SP) July 27 39
High-pressure needle valve (SP) Dec. 28 29
Hydraulic servovalves. Walter Ernst Nov. 9 84
Inertia shut-off valve (SP)....Oct. 5 51
Mercury valve for gases controlled by solenoid (N) .....Aug. 24 13
Needle valve seats itself, acts as its own seal (D) .....Nov. 9 35
Open-type relief valves do not constitute a hazard (D).....Aug. 3 20
Pressure-controlled valve (SP).Sept. 14 97
Safety valve for cutting tools that use oxygen (D) .....Sept. 28 23
Sliding-sleeve control valve (SP) Sept. 7 44
Solenoid air valve (SP).....July 20 73
Solenoid valve without inrush (SP) Dec. 21 73
Three new valves from Britain (D) Aug. 24 8
2-in-1 valve (SP) .....Oct. 5 51

Variable Speed Drives
Cycloid reduction drives (SP)..Nov. 16 37

Vibration and Shock
Consolidation of distributed masses (A) .....Nov. 9 165
Damping for vibration control (A) Nov. 23 135
Dry-friction damped isolators. G. W. Painter .....Aug. 3 48
Isolation efficiency curve for flexible mounting systems (DD)..Mid-Sept. F 295
Sonic vibration reduces static friction (D) .....Aug. 17 20
Vibration limits for equipment set by operator's comfort. A. C. Potter Aug. 31 42

— W —

Welding
Arc-welding power sources. Johnson & Dudley (DD) .....Mid-Sept. D172
Award-winning lathe bed cuts costs by 35% (N) .....Nov. 16 20
Cheaper way to weld tubes. Helmut Thielsch .....Dec. 21 54
Determining weld size (A)....Sept. 14 149
Electroslag welder from Soviet speeds joining of heavy sections—is now available here (N).....Dec. 21 24
Electro-slag welding equipment (N) Dec. 21 23
High-hardness welding alloys (SP) Aug. 24 39
Italy claims continuous rotary plastic welder (N) .....Nov. 30 28
'Slag' welding (N).....July 20 22
Steam welding (D).....Dec. 28 8

ORGANIZATIONS

ACF Industries, Inc.—Mobile missile launcher (N).....Sept. 21 22
ASC—Microanalysis applied to manufactured products (N).....Oct. 5 12
Accurate Specialties Co.—High Purity Metals, Inc. to offer six "electronic metals" (N).....Nov. 30 13
Acheson Colloids Co.—Improved lubricants of the solid-film and dispersion type (D).....Sept. 14 35
AEI Lamp & Lighting Co.—Tungsten-rhenium alloy wire for thermocouples (D) .....Oct. 19 11
Aerodyne Controls Corp.—Resetting pneumatic fuse (SP).....Aug. 17 75
Aeroflex Corp.—De torque motor (SP) Dec. 14 43
Aerojet-General Corp.
Call for more plastics standards, handbooks (N).....Nov. 2 22
Flexible zinc-silver-chloride batteries that can be spliced (D)....Aug. 10 7
Hires summer engineers (N)...Aug. 3 21
Instrument measures temperature, pressure and strain (D)....Oct. 5 7
Portable fault locator and evaluator (T) .....July 27 34
Aero-O-Line Mfg. & Supply Co.—Fasteners have offset recess (SP)..Nov. 9 105
Aerospace Industries Association
Forecasts of aircraft and missile needs (N) .....Aug. 10 13
Lack of measurement standards challenges critical weapon reliability (N) .....Sept. 7 26
Aero Supply Mfg. Co.
400-cycle ac solenoid for 600 F (D) Nov. 9 36
Inertia-shut-off valve (SP)....Oct. 5 51
Aidlin Automation, Inc.—Air puts the squeeze on tiny rivets (PD)..Nov. 23 74
Air Reduction Co. Colton Chemical—Primers for metals, easier to apply (D) Nov. 2 7
Air Research & Development Command
Future structures: four-in-one? (N) Nov. 16 15
Vacuum studies may not apply to outer space conditions (N).....Aug. 10 12
Airmee Ltd.—Simplified tape control has no electronics (PD).....Nov. 9 78
Alden Products—Polyethylene connectors (N) .....Dec. 14 15
Allied Control Co.—$25-million R&D need for electrical relay industry (N) July 6 39
Allis-Chalmers Mfg. Co.
Construction of alignment nomograms. Kececioglu & Opperthauser (DD) Mid-Sept. A26
Tractor that runs on fuel cells (D) Oct. 26-36 (N).....Nov. 2 19
Aluminum Co. of America
Coils wound with aluminum strip near commercial production (D)..July 6 33
High-hardness welding alloys (SP) Aug. 24 39
High-temperature aluminum alloys (D) Nov. 30 7
Lithium pays-off in new aircraft alloy (N) .....Nov. 23 39
Student awards—(T).....Sept. 7 38
Aluminum Co. of America Alcoa Process Development Labs.—Specifications for anodized finishes—report. R. V. Vanden Berg.....Sept. 28 44
Amcor—Air conditioner (T)....Aug. 10 46
Amercoat Corp.—Self-curing zinc coating (SP) .....Oct. 5 51
American Chain and Cable Co. Inc.
Acco Power Products Div.—Power mower—convertible handles lawn or lake (PD).....Dec. 21 53
American Designed Components Inc.—One-way mercury switch (SP) July 13 43
American Die Casting Institute—"Design clinic" (N).....Nov. 16 21
American Electronics Co.—Voltage-sensitive controller (SP).....Aug. 24 39
American Gear Manufacturers Assn.—Gear specs ready for Spring 1960 (N) .....Nov. 9 40
American Machine & Foundry
Amflex Products Dept. Hydraulic filter media in critical applications (D) Aug. 31 17
American Measurement & Control Inc.—Variable-area flowmeters (SP) Nov. 16 37
American Society of Industrial Designers
15th annual meeting—industrial designers told 'know thyself' (N) Dec. 14 30
Selling attracts interest of industrial designers (N).....Nov 23 39
ASME—Application of scientific findings in US "Slow as molasses" (N) Sept. 14 42
American Welding & Mfg.—Fabricating progress reported for titanium (N) July 13 14
American Zinc Institute—Improved chrome plate—better diecastings (N) Nov. 30 27
AMF Co.—Mobile missile launcher (N) Sept. 21 22
AMP Inc.—How to choose the right electrical connection—report. J. H. Whitley .....Dec. 7 71
Ampex Corp.
Tape recorder (T).....July 27 34
Tape recorder redesigned (T).Aug. 24 36
Amron Ltd.—High-fidelity speaker enclosure (T).....Aug. 10 46
Amsterdam Institute—High-pressure air Chadwick & Brady.....Sept. 14 71
Arcos Corp.—Electroslag welder (N) Dec. 21 24
Aries Associates—High-purity tantalum at less than $20 a lb. (D)..Sept. 28 23
Armour Research Foundation
Acoustoelasticity. Benson & Raelson July 20 56
Profitable research planning. R. W. Race (DD).....Mid-Sept. A35
Variables affecting brittle coating in stress analysis. Daily & Durelli (DD) Mid-Sept F302
Armour Research Foundation Metals Research Div.—Metals for tomorrow. Dr. D. J. McPherson (DD).Mid-Sept. B68
Armstrong Whitworth Equipment—Flowmeter compensates for variations in density (D).....Dec. 21 19
Arwood Precision Casting Corp.—Tighter investment-cast tolerances. H. Mathieson .....July 20 49
Assembly Products Inc.—Continuous-reading meter (SP).....July 20 73
Associated Automation Ltd.—Speedy tape stops fast too (PD).....Dec. 7 70
Associated Electrical Industries Export Ltd.—Miniature, hermetically sealed low-current switching relay (D) Oct. 19 11
Atlantic Research Corp.—Plastic foams developed for impact cushioning (N) Aug. 3 24
Atlas Powder Co.—Polyester premix molded parts. Doyne & Feuer..Oct. 12 76
Atomic Energy Authority (Great Britain)—May replace Zeta machine (N) Aug. 3 22
AEC
Fused-salt process for applying metal coatings (N).....Nov. 30 13
Heat, pressure and radiation effects on graphite (N).....Oct. 5 12
High-strength vanadium alloys (D) Nov. 2 7
Krypton 85 as static eliminator (D) July 20 20
More "bootstrap" reactors coming (N) Sept. 21 13
Nuclear-process heat reactors (D) Dec. 7 39
Radiation protection afforded by homes studied (D).....July 27 10
Synthesize elements for power sources (N) .....Nov. 30 12
Atomics International—Bootstrap reactor enters second stage (N)..Sept. 7 12
Atton Development Ltd.—Remote-controlled lawnmower (D).....July 13 11
Automatic Timing & Controls Inc.—Transistor-equipped timer (SP) Nov. 23 97
Automatic Valve Co.—Control valves use poppet (SP).....July 6 83
Barden Corp.—How ballbearings will perform. B. C. Mims. Pt. I Sept. 14-78, Pt. II .....Sept. 28 41
Barksdale Valves—Solenoid air valve (SP) .....July 20 73
Baskon Corp.—Movie projector—complex casting—but simplifies projector design (PD).....Dec. 7 68
Battelle Memorial Institute
Brittle materials—what makes them that way? (N).....Aug. 24 14
Cold crucible answers titanium-melt problems (N).....Nov. 23 38
Comparison of belts, chains, gears. E. S. Cheaney & others (DD)....Mid-Sept. E210
Fabricating progress reported for beryllium (N) .....July 13 14
Fluid-flow models predict design performance. Putnam & Ungar Aug. 17 64
Opens doors to private irradiation (N) Dec. 28 20
Purest crystal ever (N).....Nov. 23 40
Reactor fuel elements cast in vacuum (N) .....Nov. 2 22
Strain measurement under boiling water simplified (N).....Oct. 26 37
What ultrasonics can do—and can't (N) .....July 13 13
Beck & Co.—Improved insulating varnish for small motors (D).....July 13 11
Beck's Inc.—Imbedded-circuitry code drums (SP).....Dec. 28 29
Beckman Instruments Inc. Helipot Div.—Limit-stops (SP).....July 20 73
Bee Aviation—Queen Bee (N)....Sept. 7 26

Bell Aircraft Corp.—Symmetrical bending of circular plates. R. E. Wong ..... Mid-Sept. F296

Bell Aircraft Corp. Space Flight & Missile Dept.—Finding stresses in a pressure-vessel head. R. E. Wong..July 6 57

Bell Telephone Laboratories
Abrader custom-built for special job. Siefar Bortas.....Nov. 9 72
Conversions that measure (N).Sept. 21 13

Bendix Aviation Corp. Bendix Filter Div.—Filter combination (SP)....Aug. 31 51

Bendix Aviation Corp. Bendix-Pacific Div.—Sliding-sleeve control valve (SP).....Sept. 7 44

Bendix Aviation Corp. Systems Div.—Can we get more engineering per engineer? H. H. Goode.....Sept. 21 32

Besler Corp.—High-pressure connector (SP).....Sept. 14 97

Best, Melvin Associates—Portable fault locator and evaluator (T).....July 27 34
Tape recorder (T).....July 27 34

Black Tool Inc.—Cycloid reduction drives (SP).....Nov. 16 37

Blasi AG—Special templet guides 2-for-1 grinder (PD).....Oct. 26 63

Bodmar & McDermott Mfg. Co.—Disk-type check valves (SP).....Oct. 12 93

Boeing Airplane Co.
Cold-draw forming method solves tube diameter problem (N).....Sept. 14 37
Current-pathverifier for bomber's complex wiring (N).....Nov. 9 38
Cryogenic system of environmental control tested (N).....Dec. 21 25
Load-strain factors on alloys now recorded (N).....Dec. 14 24
Student draftsmen pay off (N).Dec. 14 24

Bomare—Vibration-test system (N).....Aug. 3 22

Borg-Warner Corp. Byron Jackson Div.—Oilwell drilling-machinery (T).July 27 35

Borg-Warner Corp. Ingersoll Kalamazoo Div.—Seagoing vehicle uses industrial components (PD).....Sept. 14 76

Bowmar Instrument Co.—Smaller gear packages designed (N).....July 27 22

Boynton Associates—Dynamic tool for testing (N).....Nov. 30 26

Bridgeport Brass Co.—Free-cutting sulphur copper (SP).....Aug. 31 51

Briggs & Stratton Corp.—Power unit of tomorrow is nuclear (N).....Aug. 24 30

Brion, Leroux & Cie.—High-efficiency, low inertia miniature dc motors (D).....Sept. 7 9

Britain's Atomic Energy Research Establishment—Ten-year light bulb that requires no outside power source (D).....Nov. 23 36

Britain's National Research and Development Corp.—Fuel cell licensing under sharp attack (N).....Sept. 7 28

Britain's Royal Aeronautical Society—Man-powered flight gets serious attention (N).....Dec. 28 10

British Internal Combustion Engine Research Assn.—Rotating blower eliminates seals (PD).....Nov. 9 81

British Motor Corp.—Morris Mini-minor (N).....Sept. 28 29

British Steel Castings Research Association—Microporosity and ductility of steel castings (D).....Sept. 21 9

Bronswerk (Netherlands) — Centrifugal fans (D).....Oct. 19 11

Brooklyn Polytechnic Institute—A new source of erosion (D).....Sept. 14 35

Brush Beryllium Co.
High-temperature compounds ready for evaluation (D).....Nov. 23 35
New data on beryllium-nickel alloy performance (D).....Dec. 7 39

The Budd Company—Stronger parts from work-hardened sheetmetal. H. A. Jahnle.....Oct. 26 76

Bulldog Electric—High-voltage conductor improved with plastics (N)..Nov. 16 15

Bulova Watch Co.—Transmitter timed for year in space (N).....Nov. 16 21

Burroughs Corp.—Data-processing equipment for banks (N).....Sept. 28 27

Burton Tysinger Assoc.—Duplicator (T).....Sept. 21 34

California Institute of Technology Jet Propulsion Lab — Wind tunnel achieves air speeds from Mach 5 to 9 (N).....Oct. 12 41

California Research Corp.
Hydraulic fluid for X-15 (N)...July 6 38
Oxygen increases the lubricating ability of sulfurized white oils (D).....July 20 19

Callery Chemical Co.—Air Force contracts for boron-based fuels..Dec. 28 9

Calumet & Hecla Inc. Wolverine Tube Div.—Inflatable metal tubing (SP).....Aug. 10 53

Canada's Atomic Energy Authority—Metal abundances revised (N)..Oct. 5 14

Canada's National Research Council
New way to measure liquid density (D).....Aug. 24 8
Ultrasonic applications—cost is the big obstacle (N).....Dec. 14 14

Canada's Naval Research Establishment—Nickel plating directly on aluminum (D).....Nov. 16 11

Canadian General Electric Co.
6 snap-action mechanisms. P. C. Noy (DR).....Aug. 17 68
12 special electroplates—their uses, properties and costs. P. C. Noy (RS).....Oct. 12 89

Canadian Industries, Ltd.—Stronger V-belts, fan belts, tires (D)..Sept. 21 9

Canadian Johns-Manville Co. Ltd.—Asbestos fiber lighter in color (D).....Nov. 2 9

Cannon Electric Co.—Pressure-actuated multicontest switch (SP)....July 27 39

Carlo Erba—Gas analyzer for process industries (N).....Dec. 7 42

Carnegie Institute of Washington—Stress changes electrode potential (N).....Sept. 7 12

Carpenter Steel Company—Design for corrosion resistance. N. D. Groves (DD).....Mid-Sept. B62

Carrier Corporation—Sea water freeze plant now in operation (N)..Oct. 26 38

Caterpillar Tractor Co.—Tractor equipped with power shift transmission (N).....Oct. 5 24

Central Institute for Industrial Research (Norway)—More data on titanium and columbium (N).....Oct. 19 16

Cessna Aircraft Co. Commercial Aircraft Div.—Gerteis, J. H. (PV)....Oct. 19 44

Chalon Consulting Engineers—Dimensional change with temperature. Charles Tiplitz (DD).....Mid-Sept. E294

Chance Vought Aircraft—Scout research vehicle and launcher (N).....Aug. 10 26

Chesterton, A. W. Co.
Magnetic shaft seals (D).....Oct. 12 36
Mechanical seal (D).....Oct. 26 35

Chiba Institute of Technology—New route to metal coating (D)..Dec. 28 8

Cincinnati Milling Machine Co.—Tools lag behind hard-to-machine metals (N).....Nov. 2 19

Clupak, Inc.—Paper that elongates in all directions (D).....Dec. 14 8

Co-Engineering Co.—Hermetic rotary shaft seal (SP).....Oct. 12 93

Colorado School of Mines Research Foundation—Amorphous graphite with low ash content (D).....Aug. 10 7

Columbia University—Evaporation of liquids speeded by impurities (N).....July 27 14

Columbia Univ. School of Mines—Lubricant wetting agents may sap the strength of metals (D)..Oct. 12 36

Commonwealth Engineering Co. of Ohio—Hydraulic servovalves. Walter Ernst.....Nov. 9 84

Commonwealth Scientific and Industrial Research Organization — Polymers that can serve as semiconductors (D).....Aug. 3 19

Connecticut Hard Rubber Co.—High-strength silicone rubber (SP).Oct. 19 49

Continental Oil Geophysical Laboratory—Smith, Bill. (PV).....Dec. 14 41

Cook Bros.—Concrete-mixer (T)..July 27 35

Cordo Chemical Corp.—Resin-bonded quartz sheet (SP).....Dec. 21 73

Cornell University
Mallott, Deane W. (PV).....July 13 41
Scientists aim for space heat relief (N).....Oct. 19 30
Variables affecting brittle coating in stress analysis. Daily & Durelli (DD).....Mid-Sept. F302

Corning Glass Works
High-purity silica sintered in new process (N).....Oct. 5 23
Porous nickel (SP).....Aug. 10 53

Corning Glass Works, New Products Div.—Multiform fused silica (SP).....Oct. 26 87

Counter and Control Corp.—Recycling controller (SP).....Aug. 17 75

Crain Bros.—Marsh buggy with "Terratires" (N).....Nov. 30 10

Crane Co.—Five-inch Y-pattern valve (N).....Oct. 19 16

Crompton Parkinson Ltd.—Fractional-horsepower motors (D).....July 6 34

The Cross Company—Design factors affecting machine efficiency. K. O. Tech. (DD).....Mid-Sept. A32

Crossley Machine Co.—Air-operated free-piston pump (SP).....July 13 43

Cultured Gem Stones—Cultured rubies that are strain-free (D)....Aug. 21 17

Curtiss-Wright Corp.
Acoustical shell sound suppressor developed for gas turbine (N).....Oct. 26 41
Announcement—Germans now strip some mystery from rotary engine; Detroit professes little interest (N).....Dec. 28 17
US-German rotary-type combustion engine—secrecy a feature (N).Dec. 7 44

Dahl, George W. Co.—Constant volume regulator (SP).....Nov.9 105

DeBeers Consolidated Mines—Synthetic diamond production upped (N).....Nov. 30 29

Defense Metals Information Center—Titanium can be strengthened by metal-fiber reinforcements (D)....Nov. 16 7

Denison, R. H. Mfg. Co.—Three-circuit limit switch (SP).....Aug. 3 63

Denver Fire Clay Co.—New ceramics feature abrasion and erosion resistance (D).....July 27 9

DeVlieg Machine Co.—Jigmill dial sets the dimensions (PD).....July 6 62

Dial Products Co.—Electromagnetic brakes (SP).....Aug. 31 51

Diamond Ordnance Fuze Laboratories
Microminature lamps (D)....Nov. 30 7
Miniature lamps (D).....July 13 9

Dice, J. W. Co.—PDR Electronic Micrometer (PD).....July 6 65

Dick, A. B. Co.—Electrostatic printing process outspeeds computers (N).....July 13 21

Dobeckmun Co.—Class B electric-motor insulation (D).....Nov. 2 7

Dodge Manufacturing Corp.—Cleared drives—overload protection. Arthur Terry.....Dec. 7 82

Douglas Aircraft Co.—Mercury gives liquid radiation shield for A-powered spaceships (D).....Aug. 17 19

Douglas Aircraft Company Testing Div.—For synthetic hydraulic fluids—which rubberlike material. Webster & Larkin (DD).....Mid-Sept. J535

Dow Corning Corp.
New resins for service at 500 F (D).....Sept. 7 7
Silicone rubber compounds (SP).....July 13 43

Dragon Engineering Co. Inc.—High-pressure needle valve (SP).....Dec. 28 29

du Pont de Nemours, E. I. & Co.
One machine sprays, degreases, coats (N).....Nov. 2 24
Polyethylene rubber (D).....July 20 19

du Pont de Nemours, E. I. Polychemicals Dept.—Fillers for the latest Teflon. W. R. Watkins.....Sept. 28 52

Durez Plastics—Materials for dual service—wet on one side, dry on the other (D).....Aug. 31 18

Dynametrics Corporation—Manometers—theory and application (DD).....Mid-Sept. A36

Dynamic Gear Co. Inc.—Miniature transmission (SP).....Nov. 16 37

Eagle-Picher Co. Ohio Rubber Co. Div.—Rubber-to-metal bonding. Fisch & Amann.....Aug. 3 52

Eastman Kodak Co.
High-speed color film to record tech data (N).....Oct. 19 23
Reproducer—from camera to master to copy (N).....Oct. 26 40

Eastman Mfg. Co.—90° swivel connector (SP).....July 6 83

Easton Car & Construction Co.—Dump truck (T).....Aug. 24 37

Ebbs and Radinger—One cylinder boosts the other in this diesel (PD).Oct. 12 69

Eckart-Werke, Furth/Bayr — Improved conductive paints (D).....Sept. 7 9

Econometric Institute—Predicts high demand for engineered goods (N).....Aug. 10 26

Edison Electric Institute—Efficient heat-storage system needed (D)..Sept. 21 7

Edison, Thomas A. Industries Voice-writer Engineering Dept.—Dibble, Frank B. (PV).....Aug. 10 45

Electric Storage Battery Co. Jessall Plastics Div.—10-tube tapes of vinyl (SP).....Dec. 14 43

Army's campaign under way for trucks with interchangeable parts (N) ..... Sept. 21 22
Electronic standards for industrial equipment (DD) ..... Mid-Sept. I470

General Motors Corp. Buick Motor Div.—Planetary gear train design. O. K. Keller (DD) ..... Mid-Sept. E214

General Motors Cadillac Div.—1959 Cadillac revised by top industrial designer (N) ..... Oct. 5 26

General Motors Chevrolet Div.
Compact vs small cars (N) ..... Oct. 5 23
Corvair (PD) ..... Oct. 12 70
Sealed cooling system for cars sought (N) ..... July 13 23
Suspension system highlights innovations in 1960 truck line (N). Sept. 14 39

General Motors Chrysler Corp.
Automotive exhaust afterburner devices (N) ..... July 6 27
Compact vs small cars (N) ..... Oct. 5 23
Surface fatigue is the most common cause of gear failure (D) .... July 20 20
Valiant (PD) ..... Oct. 26 64

General Motors GMC Div.—Gas-fed truck engines (N) ..... July 6 39

General Motors Corp. Inland Mfg. Div.—Design and fabrication of extruded rubber products. G. W. Beck (DD) ..... Mid-Sept. D164

GM Research Labs—New compounds sensitive to ultraviolet light (D) ..... Sept. 28 23

General Motors Truck and Coach Div.—V-6 engines take over job of driving trucks ..... Aug. 10 21

General Nuclear Engineering Corp.—Barriers that will break: protection by sacrifice (N) ..... Aug. 10 12

General Tire & Rubber Co.—Aerojet-General Corp. see under **Aerojet-General Corp.**

General Tire & Rubber Co. Aerojet Systems Div.—Brodsky, Dr. R. F. (PV) ..... Oct. 19 45

General Ultrasonics—Ultrasonic measurements (SP) ..... Aug. 24 39

Genesco Corp.—Data readout (SP) ..... Nov. 9 105

Geoffrey E. D. Groth & Associates—Oriented nylon strip for conveyor belting (D) ..... July 20 20

Germeshausen and Grier Inc.—Faster photographic films are electrically sensitive (D) ..... Nov. 9 36

Glasindustrie F. v. Tetterode—Glass-hardening process (D) ..... Aug. 10 9

Gleason Works—Arcs subtended by small angles. M. A. Donohue (RS) .. Nov. 9 98

Goettingen University—Supercritical gases may be used as super solvents (N) ..... Aug. 10 12

Goodrich, B. F. Chemical Company—Designing with rigid polyvinyl chloride. Batiuk & Rolls (DD) ..... Mid-Sept. C115

Goodyear Tire & Rubber Co.—"Terra-tires" on marsh buggy (N) .. Nov. 30 26

Grace, W. R. & Co.—Polyethylene connectors (N) ..... Dec. 14 15

Graflex, Inc.
Camera uses steel balls for flexible linkages (PD) ..... July 20 52
Eccentric drive speeds shutter action (PD) ..... Nov. 23 71

Gremar Mfg. Co.—Connectors ease strain (SP) ..... Dec. 14 43

Grinnell Co. Inc.—Cheaper way to weld tubes. Helmut Thielsch ..... Dec. 21 54

Guardian Electric Mfg. Co.—Close differential relay (SP) ..... Oct. 12 93

Haloid Zerox Inc.—Electro-photography keeps pace with printing progress (N) ..... Sept. 28 25

Handy & Harman Brazing Products Div.—Predicting gap change in brazing dissimilar metal joints. D. C. Herrschaft (DD) ..... Mid-Sept. G365

Harley-Davidson Motor Co.—Motor scooter—smoother drive without gears (PD) ..... Dec. 7 67

Hartford Fibers—Polynosic won't shrink or stretch (N) ..... Sept. 21 14

Harvey Aluminum—First extruded multiple hollow shape (N) ..... Oct. 26 39

Harwell Atomic Energy Establishment (Great Britain)—Transistors increase reliability (D) ..... Nov. 23 36

Henschelwerke G. m. b. H.—Enters US market (N) ..... Aug. 17 24

Hercules Motors Corp.—Diesel features pintle-type nozzle (N) ..... Nov. 2 24

Hi-Shear Rivet Tool Co.—Fastener inserts (SP) ..... Sept. 21 39

Hoffman Electronics Corp.—'Big Bertha' beams solar power (N) ..... Nov. 30 27

Hollingsworth & Vose Co.—Non-woven low-density filter (SP) ..... Nov. 9 105

Houghton Laboratories—Shock-resistant epoxy (SP) ..... Dec. 7 97

Hughes Aircraft Co.
Mobot Mark I—mobile handling mechanism for radioactive areas (N) ..... Sept. 28 26
Parametric amplifier doubles radar range (N) ..... July 13 24

Hughes Tool Co. Aircraft Div.—Seek ultra-hi-temp materials (N) .. Aug. 17 23

Hughson Chemical Co.—Adhesive to bond silicone rubbers that vulcanize at room temperature (D) ..... July 20 20

Hunter Spring Co.—7 Applications for the constant-force spring. H. E. Nankonen (DR) ..... Dec. 7 90

Hupp Corp. Hupp Aviation Co. Div.—Tandem hydraulic pump (SP) ..... Oct. 26 87

Illinois Institute of Technology
Doblin Jay, evaluates 1960's small cars ..... Nov. 2 32
National Conference of Industrial Hydraulics (N) ..... Nov. 16 23
Variables affecting brittle coating in stress analysis. Dally & Durelli (DD) ..... Mid-Sept. F302

Illinois Tool Works, Shakeproof Div.—Grounding-terminal screw (SP) ..... Aug. 17 75

Imperial Chemical Industries—Titanium's top operating temperature (D) ..... Oct. 19 11

Industrial Timer Corp.—Panel-mount interval timer (SP) ..... Oct. 5 51

Institut Dr Foerster, (Germany)—Measuring instrument results displayed on TV screen (D) ..... July 27 12

Institute of Printed Circuits—Experts debate problems (N) ..... Nov. 2 20

IBM
Airline reservations computing (N) ..... Nov. 23 41
RAMAC 305 (N) ..... Oct. 5 26

International Harvester Company
Dry clutch torque evaluation. Prosek & Barber (DD) ..... Mid-Sept F300
Harvester tilts to stay on the level (PD) ..... Oct. 12 72
Shaft torque: charts find equivalent sections. D. B. N. Ghosh (RS) ..... Aug. 31 47

International Nickel Co. Development & Research Div.—Ductile iron in the machine tool industry. R. M. Brosnon (DD) ..... Mid-Sept. B65

International Resistance Co.
Film research reduces computer size (N) ..... Nov. 16 22
Flexible etched circuitry (SP). Sept. 21 39

International Salt Co.—New route to purer materials (N) ..... Nov. 16 15

Intertechnique of Versailles—Centralized data-logger (N) ..... Dec. 7 42

Iron Fireman Manufacturing Co.—Painless drawing changes. J. W. Born ..... Sept. 14 83

ITT Laboratories
18 ways to control backlash in gearing. F. T. Gatmann ..... Oct. 26 71
Novel power sources (D) ..... Dec. 28 7

Japanese National Railroad—Locomotive runs on either ac or dc (N) .. Sept. 7 29

(A) Abstract. (D) Developments. (DD) Design Digest. (DR) Design Roundup. (Ed) Editorials.
(N) Technical News. (P) Perspective. (PD) Product Design. (PV) Points of View.
(RS) Reference Book Sheets. (SP) Significant Parts. (T) Trends in Appearance Design.

Jet Research Center—Shaped charge liner—tops in metal powder competition (N)....Aug. 24 27

Jones & Laughlin Steel Corp.—Ten uses of stainless steel wire, R. J. Berkol (DD)....Mid-Sept. B174

Jordan Co. Inc.—Electronic limit switch (SP)....Aug. 31 51

Joy Manufacturing Co.—Russell, J. D. (PV)....July 27 36

Kaiser Aluminum & Chemical Corp.
Aluminum casting offers efficiency, economy (N)....Oct. 26 41
Aluminum forgings for precision tolerances. Erhard & Krajewski..Aug. 17 51

Katydid Mechanisms Inc.—First 900 uniform-motion transmitter (SP)..Nov 2 37

Kellogg, M. W. Co.—Process-oriented R & D available to industry (N) Nov. 16 25

Kennington-Shankes Engrg Co.— T-nut that can be inserted and removed (D)....Nov. 16 11

Kepner Products Co.—Cartridge-type check valve (SP)....July 20 72

Kidde, Walter & Co. Inc.—How to find stresses and deflections in spoked-bearing-supports. Lawrence Berko (RS)....July 6 79

Kieffer, Sedlatschek and Btaun (Austria).—Tungsten workability increased by alloying (N)....Oct. 19 16

Kimberly-Clark R & D Lab.—Photoelectric device counts dust specks (N) Nov. 30 12

Koden Seisakusho—"Automatic caddie" (D)....July 13 11

Koppers Co. Inc. F. X. Hooper Box Machinery Dept.—Cutoff machine—gears control flying knife (PD....Aug. 31 36

Lawrence Adhesives—Triple-action adhesives (D)....Dec. 7 40

Leetronics—On-off indicator (SP) Aug. 31 51

Leland, G. H. Inc.
High-accuracy stepping motor (SP) Nov. 30 37
Variable programming circuit (SP) Sept. 7 44

LeMoteur Moderne—Trailer pushes as tractor pulls (PD)....Aug. 3 47

Lewis & Tweedie
Combination refrigerator-electric-range-sink (T)....July 27 35
Oil well drilling-machinery (T)..July 27 35
Wall thermostat (T)....July 27 35

Linde Co.
Frozen blood program sparks heat transfer (N)....Nov. 9 40
Torch coats tungsten directly to nozzle (N)....Dec. 14 32

Link-Belt Company—Malleable iron at elevated temperature. Marshall & Sommer (DD)....Mid-Sept. H70

Little, Arthur D. Inc.—USSR science position described as 'poor' (N)..Oct. 19 26

Lockheed Aircraft Corp.
Nuclear-powered fuel cells (D)..Aug. 17 20
Permanent-mold castings, W. A. Hamilton....Aug. 31 40
Packaged "portable" nuclear reactors (D)....July 13 9

Lockheed Missiles and Space Div.— 282,-000 points/min speeds data for analyses (N)....Sept. 7 34

Lord Manufacturing Co.—Dry-friction damped isolators. G. W. Painter ....Aug. 3 48

LA Dept. of Water and Power—Collapsible nylon dam controls river (N) July 6 39

Luzerne Rubber Co.—Heated rubber pipe (SP)....Aug. 10 53

Macfarlane Engineering of Glascow—Brushless alternator (D)....Oct. 5 8

Mallory, P. R. V. Co. Inc. Mallory Metallurgical Co. Div. Formable high density metal (SP)....Dec. 21 73

Mankowitz & Strasser Ltd.
15 ideas for cam mechanisms. F. Strasser (DR)....Aug. 3 56
29 blind-side fasteners. Federico Strasser (DR)....July 20 66
29 ways to fasten springs. Federico Strasser (PD)....Dec. 21 66

Marlin-Rockwell Corp.—Honeycombs crush better than foamed plastics (D)....Dec. 21 20

Marquardt Corp.—Rocket-ramjet engine combination tested (N)....Nov. 30 26

MIT.—Gas thermal conductivity measured at high temperature (N) Aug. 24 13

MIT Adhesives Lab.—When resins won't stick check for impurities (N) Sept. 7 13

MB Electronics, Div. Textron Electronics Inc.—Shock and vibration isolator (SP)....Sept. 14 97

McCorkle, D. H. Co.—Wall thermostat (T)....July 27 35

McCulloch Corp.—Egbert, Sherwood H. (PV)....July 27 37

Mechanical Engineering Research Laboratory—Design data for flat air bearings. H. L. Wunsch (DD) Mid-Sept. F288

Meletron Corp.—All-metal machined switch (SP)....July 13 42

Melpar, Inc.
Epoxy resins with greater thermal stability (D)....Sept. 28 24
Sues ex-employee for usurping data (N)....Aug. 10 26

Merendino-Green and Associates, Inc.—Oilwell drilling-machinery (T) July 27 35

Michigan State University—Educators experiment with engineer curricula, offer more science, less hardware (N)....Oct. 19 23

Midwest Automatic Control Co.—Low-cost brake for fhp motors (SP) Dec. 28 29

Minneapolis-Honeywell Regulator Co.—Nickel silver powder part molded in plastic form—tops in metal powder competition (N)....Aug. 24 27

Minnesota Mining & Mfg. Co. Reinforced Plastics Div.—Flat reinforced-plastic springs. L. A. Heggernes....Nov. 9 74

Motorla, Inc.
Plated circuits to minimize service problems (D)....July 27 9
Sturdy TV minimizes maintenance time (PD)....Nov. 9 77

Motorola Inc.'s Military Electronic Div.—Honeycomb beefs up printed-circuit panels (N)....Sept. 14 41

Mueller (W. Germany)—Brighter X-ray images (N)....Oct. 19 14

Mullard Equipment, Ltd.—Pulse-monitoring oscilloscope (D)....July 27 12

National Aeronautics & Space Agency
Bearings that last longer (D)..Dec. 21 26
Ductile ceramics (N)....Sept. 21 14
Glennan, Dr. T. Keith (PV)..Sept. 21 37
May change patent policy (N)..Sept. 7 25
New patent regulations seem assured (D)....Dec. 14 12
Proposal—Space Dept. to abolish NASA (N)....Dec. 7 45
Relativity theory still has no experimental proof (N)....July 27 14
Strange problems of space (N)..Oct. 19 14
Thermal fatigue may not be a serious design hazard (D)....Nov. 9 36
Wind tunnel achieves air speeds from Mach 5 to 9 (N)....Oct. 12 41

NASA's Lewis Research Center
Double-purpose space test rig (N) Dec. 7 44
New angle on thermal fatigue (N) Dec. 14 15

National Bureau of Standards
Document-retrieval device developed (N)....Oct. 12 40
Extends calibration service (N)..Sept. 7 28
Free radicals look less promising for space propulsion (N)....Oct. 19 14
High-temp resistance thermometry tested (N)....Nov. 16 25
Measurement milestone reported (D) Oct. 5 11
Point-source gamma-ray standards issued (N)....Nov. 30 29
Thermocouple anemometer (D)..Sept. 7 30
Wages war on corrosion (N)..Aug. 10 14
Writing instruments survey (N) Dec. 14 14

National Carbon Co.—Sulfides: new route to high-temp materials (N)..Nov. 2 13

National Conference of Standards.—10th Annual Conference—lightwave, drafting and metric standards get most attention (N)....Nov. 9 38

National Electrical Manufacturers Assn.—Joins forces with EIA, divides field (N)....Aug. 17 22

National Graphics Arts Expositions Inc.—Advances in printing equipment (N) Sept. 28 25

National Lead Co. Doehler-Jarvis Div.—Die cast aluminum engine design presented (N)....July 27 26

National Northern Corp.—Explosive-forging techniques (D)....Oct. 26 35

National Reactor Testing Station—Reactor that uses textiles for thermal insulation (D)....Nov. 23 36

National Research Corp.—Gold in your product's future (N)....Aug. 10 13

National Science Foundation
Mechanical engineers get $667,000 in research grants (D)....July 27 10
Scientific manpower program criticized by House (D)....Oct. 5 11
Subsidizes new lab equipment (N) Oct. 5 32

National-Standard Co.—Spring wire usable at 1400 F (SP)....Aug. 31 51

National Steel Corp. Enamelstrip Corp. Div.—Steel coils are precoated (SP) Oct. 19 49

National Tung Oil Marketing Cooperative—Surface coatings incorporate tung oil as the vehicle (D)..Nov. 9

Networks Electronic Corp.—Temperature-sensitive fuse (SP)....July 6 83

New Hampshire Technical Institute—Creed, Maynard E. (PV)....Dec. 14 41

Newage Industries Inc.—Pliable metallic packing (SP)....Aug. 17 75

Newman Industries, Ltd.—New bearing assembly for vertically mounted motors (D)....Sept. 28 24

Niforge Corp.—Permanent-mold coating process (SP)....July 6 82

Nippon Telegraph & Telephone Corp.—Stopping titanium's creep (N) Nov. 30 13

Noble Co.—Missile launcher (PD) Sept. 28 57

North American Aviation Co.
Aircraft stretching materials limitations (N)....Aug. 31 22
Chemical coatings protect steel surfaces when heat-treating at high temperatures (N)....Oct. 26 38
Chem-milling licensing fee halved (N) Aug. 17 22
Lithium pays-off in new aircraft alloy (N)....Nov. 23 39
Titanium carbide in hi-temp bearings (D)....Oct. 26 36

North American Aviation Rocketdyne Div.
Glass wrap for rocket engines reduces weight, cuts cost (N)....Dec. 14 44
Integrated rocket engine system design. Gill & Kusak (DD)..Mid-Sept. H418
Pressure losses in hydraulic branch-off fittings. Daniels & Pelton..July 20 60

North American Rayon Corp.—Vycon—tough new fiber (N)....Aug. 24 14

North Carolina State College—Impact and shock resistance tester for plastics (N)....July 27 15

Northrop Corp. Norair Div.—Chem-milling cuts cost as it contours honeycomb (N)....Oct. 19 21

Nuclear Metals Inc.—Variations in electrical resistivity of cold-worked metals (D)....Oct. 26 35

Numatics Inc.—Four way solenoid air valves (SP)....July 27 39

Office Equipment Manufacturers Exhibits.—Business equipment show dominated by automation, electronics (N)....Oct. 5 26

Officine Guardigli—Photoelectric feed for rolling mills (N)....Dec. 7 41

Olin Mathieson Chemical Corp.—Glass-fiber sleeve-spring for high energy absorption. Dr. K. Maier....Aug. 17 60

Oliver Machinery Co.—Award-winning lathe bed cuts costs by 25% (N) Nov. 16 20

Olivetti—Transistorized computer (N) Dec. 7 41

Omni Products Corp.—Will ship plastic pipe machinery to Russia (N) Sept. 14 40

Ontario Research Foundation—Refractory made from rice hulls (D) Nov. 30 9

Opinion Research Corp.—Togetherness fails? engineers, management disagree (N)....Nov. 2 22

Oriental Electric Co.—Low-cost rechargeable dry batteries (D)....Nov. 2 9

Oronite Chemical Co.—Hydraulic fluid for X-15 (N)....July 6 38

Ovitron Corp.
Ac static switch designed (N)..July 20 25
Electro-ionic device switches full ac sine wave (SP)....July 27 38

Owens-Corning Fiberglas Corp.—Fastening of glass reinforced plastics. M. D. Weiss (DD)....Mid-Sept. G368

Package Machinery Manufacturers Institute—Mechanisms feature latest in packaging machinery (N)..Dec. 14 21

Packard Bell Electronics Corp. Technical Products Div.—Leng, Richard B. (PV)....Sept. 7 43

Parker-Hannifin Corp. Hannifin Co. Div.
Logarithmic diagrams. Gil Riske Nov. 23 62
Minimum screw-lengths for tapped holes. Gil Riske (RS)....Sept. 28 69
Pressure losses in pneumatic systems Gil Riske....Oct. 26 50

Parker-Hannifin Co. Parker Hydraulics Div.—Hydraulic pumps (D)..Dec. 28 7

Pennsylvania State Univ.—New crystals for electronic jobs (N)....Aug. 24 13

Permali Ltd.—Wood that stops neutrons (D)....Nov. 30 9

Permatex Co. Inc.—Sealants for fluid control. W. M. Langton (DD) Mid-Sept. J541

Pfizer, Chas. & Co.—New enameling process (D)....Oct. 19 8

Philco Corp. Electronics Operations—Craig, Palmer M. (PV)....Sept. 7 42

Phillips of Eindhoven (Netherlands)—New drive mechanism that promises greater thermodynamic efficiency (D) July 20 19

Phillips (Holland)—Brighter X-ray images (N)....Oct. 19 14

Philips N V—Magnetic material with high coercive force (D)....Nov. 16 11

Picker X-Ray Corp. Waite Mfg. Div.—"Self-powered" X-ray tube (D) Sept. 21 7

Plastic Associates—Solderless connections (SP)....Dec. 21 73

Plessey Co. Ltd.—New line of thermistors (D)....July 6 33

Politecnico dil Milano—Combination instrument measures output of very small motors (D)....Sept. 14 36

Polymer Processes Inc.—Vinyl coating methods for metal parts. F. J. Nagel ....July 6 70

Porcelain Enamel Institute—Color-selector system for porcelain enamels (D) Nov. 9 35

Thirion (France)—Automatic lubricator for pressurized stuffing boxes (D) .....Dec. 7 40
Thompson Ramo Wooldridge
Automotive exhaust afterburner devices (N).....July 6 37
Fabricating progress reported for columbium (N).....July 13 14
Manildi, Joseph F. (PV).....Aug. 10 44
Thompson Ramo Wooldridge Inc. Ramo-Wooldridge Div. — Ceramic mirror blanks (SP) .....Sept. 7 44
Thwing-Albert Instrument Co.—Instrument measures resinous film and coating hardness (N).....July 13 14
Timech Corp.—High-current timer (SP) .....Oct. 5 51
Titan (France)—Trailer brake cools self centrifugally (PD).....July 6 64
Torres Engineering Co. Inc.—Cam-actuated snap switch (SP).....July 6 83
Torrington Mfg. Co. Air Impeller Div.—Operator's comfort sets vibration limits for equipment. A. C. Potter .....Aug. 31 42
Trabon Engineering Corp.—Pop-up indicating pins (SP).....Sept. 28 73
Tracerlab, Inc.—Gas goes "solid" (D) .....Aug. 24 7
Transflow Corp.—2¼-in-ID pump has 10 gpm flow rate (SP).....Nov. 2 37
Tucker Corp.—SNO-CATS (N)....Dec. 7 42
Turbocraft Inc.—High-pressure, low-flow pump (SP).....Aug. 3 63
Turb-O-Heat Inc.—Centrifugal-action liquid heater (SP).....Oct. 5 51
Turco Products Inc.—Chem-milling cuts cost as it contours honeycomb (N) .....Oct. 19 21
Twin Disc Clutch Co.—Electromagnetic clutch (SP).....Sept. 28 73
Union Carbide Metals Co.—The yardsticks for research success. A. A. Lytle .....Oct. 19 34
Union Carbide Plastics Co.
Metallo-ceramic polymers for very-high temperature with radiation-polymerization technique (D).....July 13 11
Three new epoxies join the pre-preg laminates. J. L. Welch.....Aug. 31 38
Union Carbide Plastics Co. Development Laboratories—New epoxy-fiber compositions for production. A. P. Mazzucchelli (DD).....Mid-Sept. D166
USSR Academy of Sciences—Amplified brain waves can be used to control (D) .....Nov. 30 9
United Aircraft Corp. Hamilton Standard Div.—Measure drafting time by the square foot. D. H. Millenston .....Aug. 31 32
United Aircraft Corp. Norden Div.—Decimel display of position (SP) .....Aug. 10 53
UK Atomic Energy Authority
Liquid-level probe (D).....Dec. 14 11
Three new valves (D).....Aug. 24 8
U. S. Army—Aluminum electrolytic capacitors (D) .....Aug. 17 19
U. S. Army Ballistic Missile Agency Instrument Development Section—Liquid level detectors. T. L. Greenwood (DD).....Mid-Sept. J534
USARMA, Redstone Arsenal—7 moment formulas for rectangular frames. George Detko (RS).....Nov. 23 93
U. S. Army Engineer Research and Development Laboratories—Assists for missile and rifle men (N)....Aug. 3 25
U. S. Army Medical Center—Porous plastic laminates (D).....Sept. 14 36
U. S. Army Ordnance—Releases R & D thinking to encourage industry's participation .....Sept. 7 23
U. S. Army's Ordnance, Tank-automotive Command—Measuring residual stresses in gears. Bergquist & Lenhoff .....Sept. 14 84
U. S. Bureau of Mines
Damping capacity of metals and alloys (D) .....July 6 33
Gallium replaces mercury in gas studies (N) .....Sept. 21 13
Improved way to purify the lower boiling metals (D).....Oct. 5 7
New way to make oxygen (N)..Nov. 16 13
Tin-nickel alloy coatings (D)..Oct. 26 36
To study low-energy spark discharges (D) .....Sept. 28 24
U. S. Bureau of Ships Electrical Branch—Silicones in enclosed dc motors can produce abnormal brush wear (D) .....Aug. 31 18
US Chemical Milling Corp.—Metal-removal method for closer tolerances (N) .....Aug. 10 27
U. S. Dept. of Agriculture—Surface coatings incorporate tung oil as the vehicle (D).....Nov. 9 35

(A) Abstract. (D) Developments. (DD) Design Digest. (DR) Design Roundup. (Ed) Editorials.
(N) Technical News. (P) Perspective. (PD) Product Design. (PV) Points of View.
(RS) Reference Book Sheets. (SP) Significant Parts. (T) Trends in Appearance Design.

USDA's Southern Regional Research Lab—Crimp tester (D).....Oct. 26 36
U. S. Dept of Commerce—OTS updates abstracts, adds new USSR titles (N) Aug. 31 22
U. S. Dept. of Defense
Budget has its ups and downs (N) Sept. 14 40
OK's standardizing manuals (N) Dec. 14 30
Plastics evaluation center (N).Dec. 21 25
U. S. Dept. of Health, Education and Welfare—Smith, Dr. Herbert A. (PV) July 13 41
U. S. Naval Air Material Center—Dry-film lubricants that stand 1200 F (D) Oct. 19 8
U. S. Naval Ordnance Laboratory—Rocket motor simulator to test structures, insulators (N).....Aug. 10 12
U. S. Naval Research Lab.—
Braking circuit for synchronous motors (D) .....Aug. 3 19
Iron-chromium alloys studied to reduce brittleness (N).....Oct. 19 16
Key to fatigue failure of metals at elevated temperatures (D).....July 20 20
U. S. Naval Research Lab
Mercury valve for gasses controlled by solenoid (N).....Aug. 24 13
Slots cut and then compressed for uniformity (D).....Oct. 19 8
Superior dielectric liquids can be formulated (D).....Sept. 28 23
Thermoluminescent materials (D) Aug. 31 18
U. S. Naval Research Lab. Mechanics Div.—Steel shock strength higher than expected (N).....July 27 15
U. S. Navy
Design of giant telescope.....Nov. 16 19
More millions awarded for nuclear subs (N) .....Dec. 14 29
Ordnance problem: sensitivity to radio, radar energy (D).....Dec. 7 40
Skipjack—newest nuclear submarine Oct. 26 115
Thermocouple developments to be announced (D).....Nov. 30 11
Unmanned sub views ocean floor (N) Aug. 24 35
U. S. Testing Co. Inc. Materials and Chemistry Dept.—Standard machines test candidates quickly. Donald Gardner .....Nov. 9 70
US Valve & Engineering Co.—2-in-1 valve (SP) .....Oct. 5 51
Universal-Cyclops Steel Corp.—Stainless steel strip (SP).....Oct. 19 49
Universal Grinding Corp.—Self-contained shaft seal (SP).....Dec. 7 97
University of California
Ceramic materials—properties for structural uses. Knapp & Stanley (DD) .....Mid-Sept. C118
4 ways to improve thermal insulation (N) .....Sept. 7 13
Thermoluminescence—dating technique for previously fired objects (N) Nov. 2 12
University of Calif. Radiation Laboratory—Double exposure highlights motion (N).....Dec. 28 10
University of Detroit—Liquid transition points may be as useful as those in metals (D).....Sept. 14 36
University of Michigan—Nylon resin spur gears. Hall & Alvord (DD) Mid-Sept E204
University of Pennsylvania—Quenching raises the yield point of molybdenum (D) .....Oct. 19 8
University of Toledo—16 unusual applications for the O-ring. J. F. Machen (DR) .....Nov. 23 91
Van Gelder Mfg. Inc.—Flexible coupling (SP) .....Dec. 21 73
VEB Carl Zeiss—Angle division tester (N) .....July 27 12
Veeder-Root Inc.—Endless counter tape (SP) .....Oct. 19 49
Vereinigte Oesterreichische Eisen und Stahlwerke — Compressed-air motor (D) .....Aug. 17 19
Vickers Inc.—1959 Aircraft Hydraulic Conference (N) .....Dec. 14 26
Vickers Inc. Electric Products Div.—Water-cooled clutch (SP)....Oct. 19 49
Viking Air Products—Non-clog humidifier runs on furnace current (PD).Oct. 12 73
Vitro Laboratories
5 important gasket materials. F. W. Wood Jr. (RS).....Dec. 7 93
13 handles for instruments. F. W. Wood Jr. (DR).....Sept. 14 90
12 clamps for flexible hose. F. W. Wood Jr. (DR) .....July 6 76
22 clamps for wire and cable. F. W. Wood Jr. (DR).....Oct. 26 80
Walker Art Center—Friedman, Martin L. evaluates 1960's small cars....Nov. 2 32
Walker Mfg. Co.—Stainless steel ups life of mufflers (N) .....Nov. 23 39
Waltham Precision Instrument Co.—High-strength locknut (SP)..Sept. 14 97
Warco Industries Inc.—Sequence controller (SP) .....Sept. 28 73
Warner & Swasey Co.—Curtis, M. S. (PV) .....Oct. 19 44
Waterman Hydraulics Corp.—Solenoid valve without inrush (SP) ..Dec. 21 73
Watson-Marlow Air Pump Co.—Pumping by pinch effect (D).....Dec. 14 11
Wayne-George Corp.—Photoelectric shaft-position encoder (SP).....Dec. 28 29
Web Wilson Oil Tools, Inc.—Oilwell drilling-machinery (T) .....July 27 35
Webb, H. C. & Co.—Remote-controlled lawnmower (D) .....July 13 11
Wekeman, Alfred Industrial Design—Cast epoxy models. A. W. Wakeman Dec. 21 60
Western Gear Corp.
Fume lubrication for gears (D) .Aug. 17 20
Measuring residual stresses in gears. Bergquist & Lenhoff.....Sept. 14 84
Titanium gears (N).....Aug. 24 31
Western Reserve Univ.—First step taken to mechanize translation of world's technical literature (N).....Oct. 12 39
Western Union Telegraph Co.—Flat-bed scanner uses flying spot of light (PD) .....Aug. 3 44
Westinghouse Electric Corp.
Electric speed governor (SP)..Nov. 23 97
Experimental electronic tube (N) Aug. 17 24
Molecular electronics concept (N) Aug. 17 23
Transparency of plastics can be increased (D) .....Oct. 5 7
Why decorate? W. H. Appel (T) Sept. 21 34
Westinghouse Electric Corp. Equipment Development Sec—How to measure engineering progress . . . in an engineering department. J. J. **Lahm** Sept. 7 32
Westinghouse Electric Corp. Industrial Engineering Dept.—Matching drives to loads. M. H. Fisher (DD) Mid-Sept. H428
Westinghouse Electric Corp. Lamp Div.—Electroluminescent panels (D) Aug. 24 7
Westinghouse Electric Corp. Materials Engineering Dept.—Solders for aluminum joints. W. McQuillan....Dec. 7 84
Westinghouse Research Laboratories
Bearing damage by electrical currents. Boyd & Kaufman (DD) Mid-Sept. I476
Insulating finishes with high electric strength (D) .....Dec. 21 19
Westinghouse's Television-Radio Div.—Printed circuit boards take puzzle out of tracing trouble (N)....Nov. 9 42
Weston Smith Associates—What an annual report can tell an engineer. Weston Smith (DD).....Mid-Sept. A30
Whirlpool Corp.—What ultrasonics can do—and can't (N).....July 13 13
White Sewing Machine Corp. Apex Reinforced Plastic Div.—Largest fiberglass pressure vessel (N) .Oct. 26 41
White's Reo Div.—Army's campaign under way for trucks with interchangeable parts (N).....Sept. 21 21
Wiedemann Machine Co.
Automate press (PD).....Nov. 23 72
Tape-controlled turret punch press (N) .....Oct. 19 22
Wilkerson Corp.—Quick-change lubricator (SP) .....Nov. 9 105
Williams Research Corp.—Lightweight, high-up gas turbine developed (N) Nov. 23 40
Wilmut, A. B.—Adhesive-locked nut (D) Sept. 7 9
Winslow Products Engineering Corp.—Drill-pointing machine (T). Nov. 30 30
Wintriss Inc.—Electronic control unit (SP) .....Oct. 26 87
Wood's T. B. Sons Co.—Driven sheave retains speed (SP).....Sept. 21 39
Worthington Corp.—Hirsch, S. R. (PV) Aug. 10 44
Wright Air Development Center—Embrittlement of cadmium-plated bolts can be reduced (D).....Sept. 14 35
Laminated aluminum foil is stronger and lighter than solid sheet (D) Aug. 3 20
Polymers with long-time stability at 1000 F (D) .....July 13 9
Wright Air Development Center Materials Lab.—High-temperature polymers (N) .....Sept. 7 13
Zierhut-Vedder-Shimano—Forming machine and control console (T)..July 27 34

AUTHORS' INDEX

ALVORD, H. H. & K. W. Hall—Nylon resin spur gears.....Mid-Sept. E204
AMANN, Edward & Roland Fisch—Rubber-to-metal bonding .....Aug. 3 52
APPEL, W. H.—Why decorate?.Sept. 21 34
BARBER, H. M. & J. R. Prosek—Dry clutch torque evaluation...Mid-Sept. F300
BATIUK, M. & J. A. Rolls—Designing with rigid polyvinyl chloride Mid-Sept. C115
BEAUMONT, D. & J. Kaplan—Friction drive features spring-loaded idlers July 6 54
BECK, G. William—Design and fabrication of extruded rubber products Mid-Sept. D164
BENSON, Dr. R. W. & V. J. Raelson—Acoustoelasticity .....July 20 56
BERKOL, Roland J.—Ten uses of stainless steel wire .....Mid-Sept. B74
BERGQUIST, E. T. & S. M. Lenhoff—Measuring residual stresses in gears Sept. 14 84
BERKO, Lawrence—How to find stresses and deflections in spoked bearing-supports .....July 6 79
BERT, Charles W.—Structural models—report Pt III The model at work Oct. 26 61
BONIN, L. J.—Planetary friction drive Oct. 12 79
BORN, Jesse W.—Painless drawing changes .....Sept. 14 83
BORTAS, Stefar—Abrader custom-built for a special job.....Nov. 9 72
BOYD, J. & H. N. Kaufman—Bearing damage by electrical currents Mid-Sept. I476
BRADY, P. L. & T. H. Chadwick—High-pressure air .....Sept. 14 71
BRODSKY, Dr. R. F.—Point of view Oct. 19 45
BRONSON, Robert M.—Ductile iron in the machine tool industry Mid-Sept. B65
BRUNO, Charles—Methods of soldering aluminum .....Mid-Sept. G372
BUCHANAN, Chester H.—Four ways to stop a motor.....July 6 60
CALDWELL, David F.—Magnesium-lithium .....Oct. 12 74
CARLSON, Raymond G.—Structural models—report Pt II Building the better model .....Oct. 26 59
CHADWICK, T. H. & P. L. Brady—High-pressure air .....Sept. 14 71
CHEANEY, E. S. & others—Comparison of belts, chains, gears....Mid-Sept. E210
CHIRONIS, Nicholas—Gas bearings Nov. 23 68
COOK, W. W. & W. W. Lenz—Design and construction of transistors Mid-Sept. I472
CRAIG, Palmer M.—Point of view Sept. 7 42
CREED, Maynard E.—Point of view Dec. 14 42
CURTIS, M. S.—Point of view....Oct. 19 44
DALIN, Dr. G. A. & Frank Solomon—Higher-energy batteries .....Aug. 31 33
DALLY, J. W. & A. J. Durelli—Variables affecting brittle coating in stress analysis .....Mid-Sept. F302
DANIELS, C. M. & H. A. Pelton—Pressure losses in hydraulic branch-off fittings .....July 29 60
DANIELS, Roger L.—Point of view Aug. 10 45
DAVIS, Sidney A.—Servomotor modifications to increase flexibility Mid-Sept. H421
DE BUSK, H. L. & W. R. McCarthy—Filament-winding grows up...July 20 46
DETKO, George—7 moment formulas for rectangular frames .....Nov. 23 93
DE VOS, Leon N.—Design advantages of new standards for involute splines Mid-Sept. E208
DIBBLE, Frank B.—Point of view Aug. 10 45
DOBLIN, Jay—Evaluates 1960's small cars .....Nov. 2 32
DONOHUE, Martin A.—Arcs subtended by small angles.....Nov. 9 98
DORNED, N. V.—Dubo lockwasher (N) Dec. 28 17
DOYNE, R. F. & S. S. Feuer—Polyester premix molded parts.....Oct. 12 76
DUDEY, Karl F. & Arthur Johnson—Arc-welding power sources Mid-Sept. D172
DURELLI, A. J. & J. W. Dally—Variables affecting brittle coating in stress analysis .....Mid-Sept. F302
DURHAM, C. T.—Fixed resistors.Sept. 28 61
EGBERT, Sherwood H.—Point of view July 27 37
EMOND, Lloyd—Hardness conversion—Knoop vs Vickers.....Mid-Sept. A38
ERHARD, D. D. & S. J. Krajewski—Aluminum forging for precision tolerances .....Aug. 17 51
ERNST, Walter—Hydraulic servovalves Nov. 9 84
FERNALD, F. W.—Americanizing a British design .....Dec. 7 64
FEUER, S. S. & R. F. Doyne—Polyester premix molded parts...Oct. 12 76
FISCH, Roland & Edward Amann—Rubber-to-metal bonding.....Aug. 3 52

FISHER, M. H.—Matching drives to loads ..... Mid-Sept. H428
FRIEDMAN, Martin L.—Evaluates 1960's small cars ..... Nov. 2 32
FULLER, R. Buckminister—Evaluates 1960's small cars ..... Nov. 2 32
GAGNE, A. F.—13 ways to cut drafting costs ..... Sept. 28 54
GARDNER, Annesta R.—Flameproof the product ..... Aug. 3 38
GARDNER, Donald—Standard machines test candidates quickly ..... Nov. 9 70
GARRETT, Peter L.—Job hunting—for engineers ..... July 27 32
GERTEIS, J. H.—Point of view .. Oct. 19 44
GHOSH, Dr. Biswa Nath—Shaft torque: charts find equivalent sections ..... Aug. 31 47
GIBBINGS, T. H. Robsjohn—Evaluates 1960's small cars ..... Nov. 2 32
GILL, George S. & Leo Kusak—Integrated rocket engine system design ..... Mid-Sept. H413
GLENNAN, Dr. T. Keith—Point of view ..... Sept. 21 37
GOFF, Harry—Transistors—the 6 basic types ..... Aug. 3 42
GOODE, Harry H.—More engineering per engineer? ..... Sept. 21 32
GRAVESON, Norman A.—14 identical pistons in simplified pump (PD) ..... Nov. 9 80
GRAZIANO, Dominic J. — Reserve strength in metal parts ..... Dec. 21 45
GREENE, Harry—Evaluates 1960's small cars ..... Nov. 2 32
GREENWOOD, Thomas L.—Liquid level detectors ..... Mid-Sept. J534
GRISVARD, W. B.—Point of view ..... Dec. 14 40
GROVES, Norman D.—Design for corrosion resistance ..... Mid-Sept. B62
GRUNTFEST, I. J. & others—High-temperature behavior of reinforced plastics ..... Mid-Sept. C120
GUTMANN, Frederick T.—18 ways to control backlash in gearing ... Oct. 26 71
HALL, K. W. & H. H. Alvord—Nylon resin spur gears ..... Mid-Sept. E204
HALL, Philip—Assembly and operation of air circuits ..... Mid-Sept. J530
HAMILTON, W. A.—Permanent molds can handle short runs too ... Aug. 31 40
HEGGERNES, L. A.—Flat reinforced-plastic springs ..... Nov. 9 74
HEMES, Edward C.—Today's diaphragms —coatings and fabrics ..... Oct. 26 68
HERRSCHAFT, D. C.—Predicting gap change in brazing dissimilar metal joints ..... Mid-Sept. G365
HERZOG, Edward F.—Point of view ..... Sept. 7 42
HICKS, Tyler G.—Gear-forced analysis ..... Aug. 17 71
3 nomographs aid gear-force analysis ..... Aug. 3 59
HILL, Sen. Lister—Point of view .July 13 40
HILL, William J.—Experiments that have statistical certainty ..... July 6 66
Regression analysis digs out equations from scattered data ..... July 20 62
Multi-variable experiments .... Dec. 21 56
HIRSCH, S. R.—Point of view .. Aug. 10 44
HIRSCHHORN, J.—Design of external-shoe brakes ..... Nov. 23 75
HUMPHREY, Hubert H.—Point of view ..... Sept. 21 36
JAHNLE, Herbert A.—Stronger parts from work-hardened sheetmetal ..... Oct. 26 76
JOHNSON, Arthur & K. F. Dudey—Arc-welding power sources .... Mid-Sept. D172
KAESSHOER, Karl—Flexomobil Jeep (N) ..... Nov. 9 37
KAPLAN, J. — Spring-wrapped slip clutches ..... Aug. 31 30
KAPLAN, J. & D. Beaumont—Friction drive features spring-loaded idlers ..... July 6 54
KAUFMAN, H. N. & J. Boyd—Bearing damage by electrical currents ..... Mid-Sept. I476
KECECIOGLU, D. B. & R. W. Opperthauser—Construction of alignment nomograms ..... Mid-Sept. A26
KEE, Herbert L.—4 ways to design economy into malleable iron castings ..... Nov. 9 82
KELLEY, Oliver K.—Planetary gear train design ..... Mid-Sept. E214
KNAPP, W. J. & F. R. Stanley—Ceramic materials—properties for structural uses ..... Mid-Sept. C118
KOENIG, Robert F.—How to measure engineering progress ... in a service group ..... Sept. 7 23
KOFF, Richard M.—8 steps to better engineering writing Pt I Sept. 7-21, Pt II Sept. 14-45, Pt III Sept. 21-29, Pt IV Sept. 28-31, Pt V Oct. 5-47, Pt VI Oct. 12-43, Pt VIII Oct. 19-43, Pt VIII ..... Oct. 26 43
The 9th step to better engineering writing ..... Dec. 14 39
What the experts tell us about mechanical r3 reliability ..... Nov. 16 27
Where ideas go begging—Patent Office ..... July 13 36
KOLB, John & D. L. McFarland—What shapes aircraft? ..... Nov. 16 32
KOLB, John & Sol Sanders—China drives toward her own technology ..... Dec. 28 24
KRAJEWSKI, S. J. & D. D. Erhard—Aluminum forgings for precision tolerances ..... Aug. 17 51
KUSAK, Leo & G. S. Gill—Integrated rocket engine system design ..... Mid-Sept. H413
LAHM, James J.—How to measure engineering progress ... in an engineering department ..... Sept. 7 32
LANGTON, W. M.—Sealants for fluid control ..... Mid-Sept. J541
LARKIN, R. G. & E. A. Webster— For synthetic hydraulic fluids—which rubberlike material ..... Mid-Sept. J535
LENG, Richard B.—Point of view .Sept. 7 42
LENHOFF, S. M. & E. T. Bergquist—Measuring residual stresses in gears ..... Sept. 14 84
LENZ, W. W. & W. W. Cook—Design and construction of transistors ..... Mid-Sept. I472
LIBBY, Charles C.—Prediction of induction-motor performance .. Dec. 21 42
LITTLE, J. McLeod—Evaluates 1960's small cars ..... Nov. 2 32
LUDVIGSEN, Karl—Evaluates 1960's small cars ..... Nov. 2 32
LYNCH, C. J.—How good are engineering aptitude tests? ..... Nov. 30 32
LYTLE, Arthur A.—The yardstick for research success ..... Oct. 19 34
MACDONALD, H. C.—Point of view ..... Oct. 19 45
MACHEN, James F.—16 unusual applications for the O-ring ..... Nov. 23 91
MAIER, Dr. Karl—Glass-fiber sleeve-spring for high energy absorption ..... Aug. 17 60
MALLOTT, Deane W.—Point of view ..... July 13 41
MANILDI, Joseph F.—Point of view ..... Aug. 10 44
MARSHALL, L. C. & C. F. Sommer—Malleable iron at elevated temperature ..... Mid-Sept. B70
MATTHIESON, H.—Tight tolerances can be even tighter ..... July 20 49
MAZZUCCHELLI, A. P.—New epoxy-fiber compositions for production ..... Mid-Sept. D166
McCARTHY, W. R. & H. L. DeBusk—Filament-winding grows up .July 20 46
McCORMACK, John W.—Point of view ..... Sept. 21 37
McFARLAND, Donald L. & John Kolb—What shapes aircraft? ..... Nov. 16 32
McPHERSON, Dr. D. J.—Metals for tomorrow ..... Mid-Sept. B62
McQUILLAN, W.—Solders for aluminum joints ..... Dec. 7 84
MERRIS, Dora—Engineer recruitment ... caution and prudence on both sides ..... Nov. 2 28
MEYER, Jack—East is east .... west is west ..... July 27 34
MICHELSON, Stan & G. A. Peters—Selecting control devices for human operators ..... Mid-Sept. A 29
MILLENSON, Donald H.—Measure drafting time by the square foot ..... Aug. 31 32
MIMS, Bruce L.—How ballbearings will perform. Pt I Sept. 14-78, Pt II Sept. 28 41
MOORE, W. H.—When specifying a cast iron ..... Oct. 12 65
MORRISON, Jim—How the East German engineer lives and works ... Aug. 10 38
MULLER-MUNK, Peter—How America influences European product development ..... Dec. 14 36
MUMKEN, B. J.—Bevel-gear calculations ..... Sept. 14 92
NAGEL, F. J.—Vinyl coating methods for metal parts ..... July 6 70
NANKONEN, Harry E.—7 applications for the constant-force spring ..... Dec. 7 90
NOY, Peter C.—6 snap-action mechanisms ..... Aug. 17 68
12 special electroplates—their uses, properties and costs ..... Oct. 12 32
OPPERTHAUSER, R. W. & D. B. Kececioglu—Construction of alignment nomograms ..... Mid-Sept. A26
PAINTER, G. W.—Dry-friction damped isolators ..... Aug. 3 48
PARKER, Wilton E.—Selecting the right turbocharger ..... Mid-Sept. H424
PAULUS, C. L. & others—Comparison of belts, chains, gears ..... Mid-Sept. E210
PELTON, H. A. & C. M. Daniels—Pressure losses in hydraulic branch-off fittings ..... July 20 60
PETERS, George A. & Stan Michelson—Selecting control devices for human operators ..... Mid-Sept. A29
PIASECKI, Frank N.—Evaluates 1960's small cars ..... Nov. 2 32
POLENTZ, Lloyd M.—Saving space with the liquid spring ..... Aug. 17 54
POTTER, Allen C.—Vibration limits for equipment ..... Aug. 31 42
PROSEK, J. R. & H. M. Barber—Dry clutch torque evaluation ... Mid-Sept. F300
PUTNAM, A. A. & E. W. Ungar—Fluid-flow models predict design performance ..... Aug. 17 64
RABINOW, J.—Point of view .... Sept. 7 42
RACE, R. W.—Profitable research planning ..... Mid-Sept. A35
RAELSON, V. J. & Dr. R. W. Benson—Acoustoelasticity ..... July 20 56
RAMSAUR, W. R.—Point of view ..... July 27 37
RAPPAPORT, Sigmund—5 cardan-gear mechanisms ..... Sept. 28 66
5 linkages for straight-line motion ..... Oct. 12 86
RARIDAN, W. C. & others—Comparison of belts, chains, gears ..... Mid-Sept. E210
RECTLIN, Floyd P.—6 basic design suggestions for brazed honeycomb sandwich ..... Mid-Sept. G375
REIS, Thos. F.—Clay models will shape your ideas ..... Oct. 12 68
RISKE, Gil—Logarithmic diagrams ..... Nov. 23 62
Minimum screw-lengths for tapped holes ..... Sept. 28 69
Pressure losses in pneumatic systems ..... Oct. 26 50
ROGERS, W. M. L.—Battery-powered motor ..... Oct. 12 62
ROLLS, J. A. & M. Batiuk—Designing with rigid polyvinyl chloride ..... Mid-Sept. C115
RUSSELL, J. D.—Point of view .. July 27 36
SAFFIRE, V. N. & others—High temperature behavior of reinforced plastics ..... Mid-Sept. C120
SALVA, S.—Hydrostatic head of liquids ..... Mid-Sept. J532
SANDERS, Sol & John Kolb—China drives toward her own technology ..... Dec. 28 24
SCHERR, Samuel—Soviet industrial design at the USSR Exhibition, New York ..... July 13 34
SCHMIDT, William M.—Point of view ..... July 27 36
SEMINARA, Joseph L.—What size access openings? ..... Dec. 7 62
When equipment says it in color ..... Sept. 14 67
SHAW, E. N.—Liquid cooling of electronic equipment ..... Mid-Sept. I466
SHENKER, L. H.—High-temperature reinforced plastics ..... Nov. 23 58
SHENKER, L. H. & others—High temperature behavior of reinforced plastics ..... Mid-Sept. C120
SIMON, Dr. Ralph—Structural models—report Pt I Theory of similitude ..... Oct. 26 56
SMITH, Bill—Point of view .... Dec. 14 41
SMITH, C. R.—Aluminum-alloy structures ..... Mid-Sept. F298
SMITH, Dr. Herbert A.—Point of view ..... July 13 41
SMITH, Weston—What an annual report can tell an engineer ..... Mid-Sept. A30
SOLOMON, Frank & Dr. G. A. Dalin—Those higher-energy batteries ..... Aug. 31 33
SOMMER, G. F. & L. C. Marshall—Malleable iron at elevated temperature ..... Mid-Sept. B70
SPROAT, Robert L.—Bolt threads with large-radius roots ..... Nov. 9 89
STANLEY, F. R. & W. J. Knapp—Ceramic materials—properties for structural uses ..... Mid-Sept. C118
STERLING, Dr. J. E. Wallace—Point of view ..... July 13 40
STRASSER, Federico—15 ideas for cam mechanisms ..... Aug. 3 56
29 blind-side fasteners ..... July 20 66
29 ways to fasten springs ..... Dec. 21 66
SYLVAN, T. P.—Solid-state switches ..... Mid-Sept. I474
TANGERMAN, E. J.—Creativity ... the facts behind the fad ..... Aug. 24 20
Porcelainized cast aluminum ... Aug. 17 47
TEICH, Kurt O.—Design factors affecting machine efficiency ..... Mid-Sept. A32
TERRY, Arthur—Geared drives—overload protection ..... Dec. 7 82
TIPLITZ, Charles—Dimensional change with temperature ..... Mid-Sept. F294
TRUBA, J. E. & R. N. Webber—How the shaded-pole motor performs .. Nov. 9 92
TWINING, John B.—Common thread-fit problems ..... Mid-Sept. G364
UNGAR, E. W. & A. A. Putnam—Fluid-flow models predict design performance ..... Aug. 17 64
VANDEN BERG, R. V.—Specifications for anodized finishes ..... Sept. 28 44
WATERMAN, Dr. Allan T.—Point of view ..... Sept. 21 36
WATERS, J. F.—Stress and stiffness nomograms for helical springs ..... Mid-Sept. F292
WATKINS, W. B.—Fillers for the latest Teflon ..... Sept. 28 52
WEBBER, R. N. & J. E. Truba—How the shaded-pole motor performs .. Nov. 9 92
WEBSTER, E. A. & R. G. Larkin—For synthetic hydraulic fluids—which rubberlike material ..... Mid-Sept. J535
WEISS, Marshall D.—Fastening of glass reinforced plastics ..... Mid-Sept. G368
WELCH, J. L.—Three new epoxies join the pre-preg laminates ..... Aug. 31 38
WHITLEY, James H.—How to choose the right electrical connection .... Dec. 7 71
WONG, R. E.—Finding stresses in a pressure-vessel head ..... July 6 57
Symmetrical bending of circular plates ..... Mid-Sept. F296
WOOD, Frank W. Jr.—5 important gasket materials ..... Dec. 7 93
13 handles for instruments .... Sept. 14 90
12 clamps for flexible hose ..... July 6 76
22 clamps for wire and cable ... Oct. 26 80
WUNSCH, H. L.—Design data for flat air bearings ..... Mid-Sept. F288
